## AU Generations Fund Passes Money Goal Six Months Early; Engineering, Library Goals Left to Meet

At the Board of Trustees' meeting on June 4, Director of Alumni and Development George L. (Buck) Bradberry announced that the Auburn Generations Fund, scheduled for completion on December 31, has already passed its monetary goal. The Auburn Generations Fund goal of \$61.7 million is the largest ever raised by a public university in the South. On June 4, the gifts and pledges to the Fund had reached \$63 million. However, Mr. Bradberry pointed out to the Board, all the news is not good. Despite being ahead of the goal overall, more than "\$9 million in priority programs are left to be funded."

Money needed during the next six months to meet program goals includes \$6.5 million for engineering construction, \$900,000 for the library endowment, and \$800,000 for faculty development.

Expressing his faith that all the goals of the campaign will be met, Mr. Bradberry thanked the Board of Trustees, the board of the Auburn University Foundation (which sponsors the Generations Fund) the four presidents of Auburn who have been active in the campaign, the co-chairmen and the advisory board for the Generations Fund. He praised the numbers of alumni and faculty volunteers who have worked with the development staff and cited the more than \$1.4 million contributed by Auburn faculty and retired faculty as well as the \$340,000 raised by Auburn students in a telethon in which they called Auburn alumni around the state.

Mr. Bradberry, named Fundraiser of the Year by the Alabama chapter of the National Society of Fundraising Executives earlier this spring, has stressed that, "It's easy to sell a good product. It's easy when you are working with the best, and Auburn people are the best."

Trustee Morris Savage '59, responding for the Trustees to Mr. Bradberry's announcement, complimented him and the alumni and development staff on their work on behalf of Auburn, adding:

"At the outset of this campaign several of us were rather skeptical about such a goal—including myself—in the face of the diminishing funds and an economy not doing so well, but with the eternal optimism of Coach Bradberry, we set the goal.

**PRESIDENT'S AWARD WINNERS**—Pictured with President James E. Martin, standing right, are the outstanding graduates of their respective schools of the past year at Auburn. From left, seated, are Kira Ann Hall, Arts & Sciences, Homewood; Leslie Trowbridge, Business, Stuart, Fla.; Larry Adams, Veterinary Medicine, Franklin, Ky.; Lorraine McCraw, Home Economics, Gainesville, Fla.; and Amy Propst, Education, Vinings, Ga. Standing are David Christain, Architecture & Fine Arts, Anniston; Judy Hamman, Agriculture, Boaz; Jennifer Harris, Pharmacy, Enterprise; and Carole Skoneki, Nursing, Montgomery.

"I suggest that this board go on record as commending Coach Bradberry for an accomplishment unparalleled in American public education and say how deeply we appreciate the love that Auburn men and women have for this institution."

In talking about the Generations Fund, Mr. Bradberry said, "One of the most exciting things is the number of major commitments of \$100,000 or above that we have received which add up to more than \$33 million, and six gifts have been for a million or more. That's outstanding for any university in America. I think more than anything, major gifts of this kind validate that Auburn University is an exceptional investment. We have consistently challenged potential donors to take a hard look at Auburn before making a commitment."

Although more than \$800,000 remains to be found for needs in faculty support,

endowed professorships are among the important benefits to Auburn accruing from the Generations Fund.

"When all endowed chairs and professorships that have been committed are fully in place, we will have added 24—21 professorships and three fully endowed chairs. There is a chance that by the end of this campaign we will have doubled the approximately 30 professorships we had when we first started this drive," Mr. Bradberry said.

Among those gifts for professorships:

Birmingham's W. W. Walker has endowed a professorship in the School of Pharmacy with a gift of \$357,000.

The Department of Accounting and Finance received a professorship endowed at \$250,000 by Charles McKenzie Taylor, Jr.; Montgomery's Lowder brothers have established three professorships in the

School of Business; Liberty National Life Insurance, another two.

Auburn's first fully endowed chair was established in forestry through a gift of more than \$1 million by George W. Peake, in honor of his father. The George W. Peake Professorship will seek to emphasize research related to energy aspects of forest management and forest products. In addition an endowed professorship was made possible by a gift of \$150,000 by Mr. and Mrs. Earl Weaver for the department of forestry.

Birmingham businessman, James W., Goodwin '27 has earmarked \$750,000 for faculty development out of a contribution valued at more than \$3 million. Six departments in three schools will benefit: civil engineering, mechanical engineering, electrical engineering, physics, veterinary medicine, and mathematics.

Mr. Goodwin also donated \$220,000 for the creation of a permanent fund for academic scholarships, which raises to more than \$3 million the total amount committed for student scholarship programs. He has also given support to the music department, the Auburn Band, and veterinary medicine building program, and athletic scholarships.

"We are well over our long range goal of \$2 million for scholarships," Mr. Bradberry notes. "At this point we have \$3,600,000 in commitments and that doesn't count \$200,000 from the Auburn University Foundation and \$1 million committed by the Board of Trustees from the general endowment fund to establish an Opportunity Scholarship Endowment. When that is included, over \$5 million additional dollars should be in place when all campaign pledges are paid off."

Mr. Bradberry noted that "some major corporations have a vested interest in keeping our best students in Alabama and have made large gifts for endowed scholarships based on merit."

Despite the large amount received for scholarship endowment, however, Auburn still has areas which need scholarship support. "Many of the endowed scholarships are restricted to selected areas. There has not been the broad range of support that we truly need. Some areas have not received any support at this time," explained Mr. Bradberry.

A pleasant surprise has been the large amount of equipment donated to the University during the campaign. "To date we have received over \$3.5 million worth—nearly all of it computer related."

The Generations Fund's largest gift came from Birmingham industrialist John Harbert: \$5 million, which is being used to construct a building for civil engineering. "John's gift has had a major impact on other donors since it was made as we publicly kicked off the campaign," said Mr. Bradberry.

Additional "in kind" gifts of art objects, scientific equipment and real estate have been received.

Andalusia forester Solon Dixon gave land valued at \$3.8 million, and two faculty members and their sister donated 28 acres of land with immense archaeological and historical importance, valued at approximately \$200,000. The donation was made by Auburn faculty and alumni Will Liddell, Jr., at AUM and his wife Mary; Laura Ann Liddell Hall and her husband, Norman, of Huntsville, and Oxford Stroud and his wife, Mary Anne.

"There are still exceptional needs," Mr. Bradberry pointed out, noting that the \$2.5 million goal for the library, a top priority in the campaign, is still short by \$900,000. A \$600,000 challenge pledge by Mr. Goodwin is adding impetus to the drive.

"We are approaching \$300,000 in matching gifts, including one for \$100,000, toward the challenge. We are emphasizing that donors can double the value of their gifts by making their pledges before we reach the \$600,000 challenge. This gives us an incentive to put a lot of emphasis on the library."

Because of time and staff limitations, the number of donors reached by personal contact is always less than the number willing to give, according to Mr. Bradberry. But it hasn't hampered the campaign. All alumni will be reached by personal visit, telephone, or mail.

**SULLIVAN AWARDS**—Auburn University President James E. Martin extends his congratulations to winners of the Algernon Sullivan Award as part of the annual Presidential Awards luncheon. The Sullivan Award for exemplifying helpfulness and goodwill went to Karl Kapoor of Franklin, Ky., and (left) to Tammy M. Moody of Brandon, Miss., and jointly to a retiring faculty couple, Marjorie and Wilbur (Bodie) Hinton. She is retiring from the Department of Family and Child Development; he, as head of the Music Department.

## Ten Win President's Awards, 4 Sullivan

In ceremonies each May, the President's Award is given to an outstanding graduate of each of Auburn's ten schools. The recipient is chosen for the honor on the basis of scholastic achievement (a minimum grade point average of 3.4 out of a possible 4.0), qualities of leadership, citizenship, and character, and the promise of professional achievement. At the same time, the Algernon Sydney Sullivan Awards are presented for service to mankind.

This year's President's Award winners and their respective schools are: Judy Hamman of Boaz, Agriculture; David Christian of Anniston, Architecture and Fine Arts; Kira Ann Hall of Homewood, Arts and Sciences; Leslie Trowbridge of Stuart, Fla., Business; Amy Propst of Atlanta, Education; Melanie Herring of Auburn, Engineering; Lorraine McCraw of Gainesville, Fla., Home Economics; Carole Skoneki of Montgomery, Nursing; Jennifer Harris of Enterprise, Pharmacy; and Larry Adams of Lexington, Ky., Veterinary Medicine.

Student winners of the Sullivan Award are Tammy M. Moody of Huntsville and Karl N. Kapoor of Franklin, Ky., now living in Elizabethtown, Tenn. With the sanction of the Sullivan Award administra-

tors, the Auburn committee selected a retiring faculty couple, Wilbur (Bodie) Hinton and Marjorie Hinton, as the non-student recipients. He is retiring as head of the Music Department and she from the Department of Family and Child Development. The Sullivan Award is presented on selected campuses to honor a male and female student and one non-student who have exhibited "those high qualities which ennoble and beautify living and bind man to man in mutual love and helpfulness."

## Allison Fellowship Goes to Smith

Brackin A. Smith of Muscle Shoals is the 1984-85 recipient of the Allison Fellowship, which honors the late Fred Allison, former dean of the Graduate School and head of the Physics Department.

Supported by an endowment established by friends of Dr. Allison, the fellowship is awarded on the basis of scholastic promise, academic achievement, and demonstrated interest in pursuing a career in physics. Brackin received the Freshman Physics Scholarship last year and maintained a 3.91 (out of a possible 4.00) grade point average.

**FUNDRAISER**—George L. (Buck) Bradberry, Director of Alumni and Development, recently was named Outstanding Fund Raising Executive for 1984 by the Alabama chapter of the National Society of Fundraisers.

## Political Science Dept. Adds Honors Program

The Auburn Political Science Department has begun a new program to honor academically superior students in that department. The first three students to be selected are Michael Mansfield of Mobile, Pamela Vines of LaFayette, and John Bradwell of Montgomery.

Unlike the Auburn University Honors Program for which students are selected before they come to Auburn as freshmen, the Political Science Department will name students who have achieved outstanding records in their first two years at Auburn. A faculty screening committee selects students for the two-year program.

During their junior years, the students will have a directed reading study program with the goal of selecting a thesis topic. In the senior year, the students must write an acceptable thesis, complete a graduate seminar with a grade of B or better, and keep a 3.4 average in all political science courses.

## Business Announces '84 Honors, Names Lowder Distinguished Alumnus

The School of Business announced its 1984 awards and recognitions at a banquet in May which honored Edward L. Lowder '34 of Montgomery as its distinguished alumnus. Mr. Lowder, who helped form the Alabama Farm Bureau Insurance Companies in 1946, retired in 1980 as vice president for those organizations and remains active with a number of his sons' businesses. He received an honorary doctor of laws from Auburn in 1980. A member of the Auburn University Foundation Board and the Advisory Board for Auburn University at Montgomery, Mr. Lowder has been honored with three professorships in

the School of Business.

Faculty awards went to Atha Beard, assistant professor of accounting and finance, who was named outstanding undergraduate professor for the year, and Amitava Mitra, assistant professor of management, who received the same honor for the graduate program.

Recipients of student awards include Cynthia T. McGehee, the Alabama Bankers Association Banking and Finance Award; Scott Buxton, named Omicron Delta Epsilon Outstanding Student; Mattias Stickler, Thompson Scholar in Marketing and Retailing; and Tammy Frazer, Alabama Society of CPAs Scholarship Award.

## Three Alumni Profs Named

Two engineers and a chemist are the latest Auburn faculty members to be named Alumni Professors. The three professors, whose terms begin in October, are Larry D. Benefield '66, associate professor of civil engineering; Eugene Hill, professor of chemistry; and David Hill, associate professor of agricultural engineering.

The Alumni Professorships, which recognize achievement in teaching and research were established in 1966 through the Auburn University Foundation's Annual Giving Fund. The five-year appointments carry a salary supplement, and are non-renewable. There are 15 alumni professors at AU, as well as an alumni writer-in-residence and an alumni artist-in-residence.

Dr. Benefield holds the bachelor's and master's degrees from Auburn and the Ph.D. from Virginia Polytechnic Institute. After teaching at VPI, Mississippi State University, and the University of Colorado, he joined the Auburn faculty in 1979. Dr. Benefield's field of specialization is environmental engineering.

William Eugene Hill holds the bache-

**NEW ALUMNI PROFESSORS**—Auburn University President James E. Martin (second from left) has appointed three new Alumni Professors to five year terms, effective Oct. 1. From left are: David Thomas Hill, associate professor of agricultural engineering; Larry D. Benefield, associate professor of civil engineering; and David Eugene Hill, professor of chemistry. The Alumni Professorships were established in 1966 by the Auburn Alumni Association and the Auburn University Foundation to recognize faculty achievement.

lor's and master's degrees from Florida State University, and the doctorate from Strathclyde University in Glasgow, Scotland. He began his career as a research chemist with Rohm and Haas Company, Redstone Research Division, in Huntsville in 1966. He joined the AU faculty in 1970.

Dr. Hill is co-author of some 56 papers for professional journals, the author of four classified publications for the Department of Defense, and three unclassified publications in military journals.

Davis Thomas Hill holds an undergraduate degree from Abraham Baldwin Col-

lege, the bachelor's and master's degrees from the University of Georgia, and the doctor of philosophy degree from Clemson University.

He taught at Clemson and the University of Florida prior to joining the AU faculty in 1979, with emphasis on research. To date he has been co-leader on two extramural grants, one for cooperative research and training in biomass conversion and utilization and the other concerned with methane production from waste biomass as an alternative energy source for Alabama agriculture.

**BUSINESS DISTINGUISHED ALUMNUS**—Edward L. Lowder (right) of Montgomery, named distinguished alumnus of the year for the School of Business, addressed participants attending the 1984 awards banquet held in May. Dean George R. Horton commended Mr. Lowder for his work with the Alabama Farm Bureau Insurance Companies, his service to numerous industrial boards, and his continued involvement with his sons in their conglomerate. Awarded an honorary degree from Auburn in 1980, Mr. Lowder has had three professorships established in his name in the School of Business. At right is Catherine Kennedy Lowder.

**CLASS OF 1917**—Pictured at their class reunion are members of the class of 1917. Seated, from left: Dr. Charles Isbell, William R. Lassiter, and W.A. (Happy) Askew. Standing are George R. Bowling and William J. Howard.

# Points & Views

Here and There—

## To Each His Own

By Jerry Roden, Jr. '46

Among the active young Alabamians who rank high in my affection and esteem is Bill Edwards, a lad who is quick of study, tireless in pursuit of duty, and thoroughly professional in whatever he undertakes. Born and reared in California, Bill had upon reaching manhood the good taste to migrate to Alabama and take up permanent residence here.

After working with various agencies which sent him up and down and back and forth across the state until he knew Alabama better than most native citizens, Bill enrolled in graduate classes at the University of Alabama and earned a master's in social studies. Soon thereafter, he came to Auburn for a few years as director of the Alabama Coalition Against Hunger, an organization with state headquarters here. During that time Bill and I became well acquainted, and I developed an enduring regard for him—despite radical differences in our football loyalties and some notable differences in our personal philosophies.

Even though our football interests gravitate to opposite poles, neither Bill nor I rate as twenty-four karat sports enthusiasts. In fact, each of us holds such obsessive educational, political, social, and intellectual ideals that genuine sports fanatics probably would grant neither of us the ten-karat ranking necessary to qualify as minimal supporters of the Orange and Blue on the one hand and the Crimson and White on the other.

Through the years of first acquaintance and then friendship, Bill and I have worked together quite congenially on a number of projects of civic, educational, and social import. Somehow, we have reconciled our vastly different approaches to and divergent philosophies on enduring human problems and worked harmoniously toward the same goals.

Yet, in spite of our low rank as sports fans, we have never quite managed to avoid a little friendly but pointed needling of each other about our War Eagle versus Crimson Tide sympathies. On April 28, Bill—who is now back in Tuscaloosa as director of the Community Action agency there—came back to Auburn for a day of workshops and the annual business meeting of a philanthropic organization to which we both belong. And, once again, Bill and I were working harmoniously to the same ends.

After a day of intense presentations, discussions, and organizational transactions, several participants—including Bill and me—gathered at the home of Nancy Spears on Cary Drive for a relaxed review of the day's activities and a renewal of friendships. It was a thoroughly pleasant social gathering from beginning to end. But before the happy conclusion of the evening, Bill just had to give one swift jab with his Crimson-tipped needle. Because of the outcome of last fall's Iron Bowl and because of Bill's subtle nature, he couldn't launch a frontal assault. So, he feigned a yawn, gave me a quick sidelong glance, and muttered: "Got to get on the road to Tuscaloosa before long—Auburn is so dull!"

That jab struck the center cap of my Irish priming,

**NEW PRESIDENT**—Dr. John Kuykendall and his wife, Missy, both members of the Auburn staff, were recently honored by the Auburn faculty before moving to North Carolina where Dr. Kuykendall will assume the presidency of Davidson College.

and I shot back an Orange and Blue rocket to this effect: *Just as beauty exists in the eye of the beholder, dullness proceeds from the mind of the perceiver.* Bill returned fire with some witty rejoinder—which I pretended not to hear, because a devotee of the losing team deserves the courtesy of the last verbal volley on matters of Orange and Blue and Crimson and White.

Besides, having let off a little excess of emotional pressure, Bill and I—like the others around—were ready to return to matters of greater import until we parted—with Bill on his way to the confines of the Tuscaloosa which excites him so and with me rolling toward the tranquility of the wilderness on the eastern outskirts of Stonewall to which I retreat most weekends for restoration from the sometimes excessive excitement generated within me by the forever vibrant Auburn University and its adjoining community.

\* \* \*

**A Footnote**—The subject has received widespread favorable publicity, but it is so significant that one more commentary seems not merely desirable but essential.

Dr. Wilford Bailey has provided Auburn distinguished service in a variety of capacities—including teaching, research, and administration—over a long period of time. And he has crowned that notable career with his relatively brief but impeccable tenure as Auburn University's president. The Board of Trustees demonstrated a keen sense of propriety and a proper respect for historical accuracy when it eliminated that awkward term *interim* and let Dr. Bailey's service go into the official record as that of our *thirteenth president*. I still marvel at the remarkable feat of restoration, preservation, and preparation for the future which Dr. Bailey performed.

Equally worthy of further commentary is the commendable work of the Board—and especially that of Bobby Lowder and his committee—in finding

a suitable successor to Dr. Bailey. Like President James Martin came to his task with an accurate perception of the greatness already achieved and a clear vision of the University's potential for even greater attainments in years to come. Our University is in good stead, all concerned—faculty, students, alumni, and the general citizenry of Alabama—have abundant reasons to look with confidence and high expectations to the future.

\* \* \*

**A Good Shepherd**—Very shortly Dr. John Kuykendall will vacate his position as Head of Auburn University's Department of Religion to assume the presidency of Davidson College. It has been a privilege for hundreds of Auburn people to be associated with this compassionate, disciplined, highly intelligent man, who has served as a minister, a professor, a college administrator, and a devoted civic worker. Everywhere he has been, Auburn, John Kuykendall has become a source of inspired confidence in the relevance of religion, scholarship, and steadfast principles to the ordinary life. Auburn will miss his quiet and steady presence but will benefit for years to come by his precepts, his example, and his countless

## The Old Apple Tree

By Bob Sanders '52

It's funny about ripples, from even the smallest pebble.

About four years ago (I'd forgotten how long it'd been), I did a piece in another publication about an old apple tree of my youth. We called it The June Apple Tree. It had been there since long before my earliest memory. It was right in the center of a little patch that became The Orchard, when Daddy sent off to Stark or somewhere and got some other varieties of apples to go with it.

But it was always my favorite. It was a gnarled old tree. Some of its branches had died, leaving it what we used to call whop-sided, with one big limb sticking out in a northerly direction.

The trunk was pitted with thousands upon thousands of sapsucker holes. The apples themselves were the kind that were almost good to eat from the time they were the size of marbles, at least they were to me and my cousins. The tree was prolific, and we'd annually gorge ourselves long before the apples reached ripeness. There'd always be a few cases of the green apple grunts. I mean, Cousin Wynell didn't have no quittin' sense, as Daddy used to say.

The apples wouldn't be very big even when mature, and they'd still have an appealing tartness that mellowness couldn't completely cover. As they ripened, the green color would gradually change to a striped red.

Mother would peel and slice them and spread them on pieces of roofing tin to dry in the sun, with a few chinaberry twigs spread around to, it was optimistically thought, discourage flies. Now that I think back on it, I don't believe the flies paid any attention at all to the chinaberry twigs.

But the little slices would get dry and turn brown and curl up, and then they'd be stored till the winter, when they would reappear in wonderfully greasy, thick, fried apple pies, or turnovers, as some people call them. Hot, with a huge chunk of old Fan's Jersey butter melting on top...it was to go into a paroxysm of ecstasy.

I told in that article how, just before the old tree died, I brought a sprout from it and planted it down here, thus keeping the line alive.

Well, a few days ago, a note reached me via a round-about-route—it had been shunted from one office at the magazine to another—inquiring about my address and how I could be reached.

I contacted the lady, and discovered that she lives "out from"—and I understand about living "out from" a metropolis—a place called Sneedville, Tennessee, which (World Book informed me) is in extreme eastern Tennessee, just south of Virginia. I told her in my note that it seemed like a wonderful kind of place, and she replied that, indeed it was, with beautiful mountain scenery and small farms and all.

She said she'd been browsing through some back issues and stumbled across the piece, which reminded her of a June apple tree of her youth, and she wondered if it'd be possible for her to get a cutting that she could graft or a sprout to plant....

Well, let us now pick up where the original article left off. Daddy, before he died, got a sprout from MY tree and took it back to Lamar County and planted it on a terrace down below the house....

Then my tree died. So we have here the case of a well-traveled apple strain. From the old home place to Auburn and back to the home place, where, last I noticed, it was thriving.

So, if there's enough of it to get a cutting from, and if I can figure out how to mail it to her, one of these days, when I get around to it, I'll send her a piece of the old June apple tree, the one I used to ride by on the way to the Ridge Field, to get an overall pocketful of little green or striped apples; and sometimes Old Bill wouldn't stop when he was supposed to and the big limb would rake me off his back. I never seemed to learn.

They weren't the kind of apples you see gorgeously displayed at the supermarket, but they were special. I hope the Tennessee lady gets to someday enjoy them too.

## Getting Personal

By Iris Dabrowski '84

I did not want to go to college; I think that is of foremost relevance. Having gone against my wishes, I have fought an uphill battle. The strongest vice affecting me has been procrastination; I think it is safe to say that we put off the things we are loath or afraid of. Even this article is a last-minute blood-letting.

At seventeen, I sought to gain knowledge from experience, not textbooks. However, at seventeen, I had enough foresight to know that if by any chance I did not gain any practical knowledge from the outside world, I would have nothing to show for how many years had gone by. So I made the decision to go to college, in hopes that at the end of four years, I could say I learned something, and be able to prove it as well.

It is now the end of four years: time to graduate. A friend asked me recently (he is what they call a professional student) if I considered myself educated. I answered him with a frank, "no." I still have so much to learn, from books as well as experience. The strange thing is, the adventures I sought at seventeen and that I longed for all four years, suddenly no longer appeal to me. Is this what they call maturity? I do not know.

Year after year, graduating seniors write farewell columns. I do not know what makes me worthy of attempting to write what it is one gathers at Auburn, or at any university for that matter, but I will attempt.

I could recap my four years into a few paragraphs. I suppose there are two kinds of students: those who study and those who don't. I was of the latter. My freshman year, typical for a girl brought up in a very strict home, was basically one of casual abandon. I won't go into detail except to say that it involved late hours, paper bags over heads, buckets of water, a toilet stolen from a Chinese restaurant and placed in the architecture building elevator, and two very ugly

girls at the Old South parade. (Need I mention we were not invited?)

I decided my sophomore year that I should declare my independence. Having acquired a job at a grocery store, I thought I might be able to put myself through school and cut myself off from any restrictive parental strings. How wrong I was! School and too much work, like too much play, do not mix. It was a learning experience, though. I scrubbed floors, dealt with some unpleasant people, and suffered the resentment of co-workers who knew I was there only for a short while before I moved on to a better life. It was a taste of the outer world adventures I thought I needed so badly. It was humbling.

My junior year I would describe as one of panic. Suddenly I realized the end was near and that nothing had been accomplished. I had not even met all the people I wanted to meet. I decided to join clubs and go out for sorority rush. Everything I went out for that fall I seemed to get, except one thing: a bid to a sorority I really liked. Friends within the sorority told me later that I was just too old. At eighteen, going on nineteen, I hardly considered myself a fossil. But it seems the Greeks need people who can devote as much time and money as possible. As a junior, I did not have much of either. But I had myself and I wanted to give so much. Rejection hurt. I learned then also; sometimes we are rejected for things even beyond our control. I will always regret not having gone Greek, for it cannot be denied that it is a vital part of college. However, I am proud that the friendships I did make cost me no money and that they were formed because we had something in common other than belonging to a specific group. I made my friendships by giving of myself.

I have reached my senior year, and I see the light at the end of the tunnel. In a few days I will be free to embrace any and all adventures I have forthcoming. One that I have chosen is marriage.

Marriage? people say. Now why would you want to do a thing like that? What about your career? What were the last four years for? As if marriage were a terminal, crippling, incapacitating disease.

It is 1984, and the pressure I have felt to become something other than a wife and mother is as strong as the one my mother must have felt to become just that. Societal demands have inversed. It is no longer enough to be a wife and mother, a career as well must be fitted into the biological time schedule.

It took me a while to accept the proposal of marriage: six months of deliberation and then six months of engagement. Aside from learning that I love him, I realize that he is irreplaceable. My career can be created; it will be what I make of it. The relationship cannot. It is a gift, just as my education was, and I will treasure it.

When I leave Auburn, it will be for a long while, for I will be living overseas in exotic places like Egypt, Africa, or South America. The environments will contrast drastically with the one in this sleepy, often lulling, village.

All year long there is a warm wind in Auburn, I think. Everyone comments on the friendliness of the people. Perhaps it is not so much friendliness as it is unity. How fun it is to see orange and blue outside of Alabama! I have to admit I will miss that unity that is felt at football games. I did not feel it until my senior year, but it is exciting to be part of a winning group. Everybody loves a winner, they say.

Auburn. Is that for the fiery orange of the swollen sun that sets here? For the pompoms, or the almost tangerine-gold of some southern girl's soft hair? The blue I have always associated with dignity, intelligence and pride. Who would have thought colors would mean something to a rebel like me?

I am a War Eagle. I have learned a little of all that

life will have to offer me; I have gained some depth, some solidity, some goodness and some badness, and I have come out the better for it. I have no regrets in having given four years of my life to being a student at Auburn. The years were difficult, but well spent.

### The Editor's Column—

## On Passing Twenty

By Kaye Lovvorn '64

First Leslie Hamby put the blunt news in the Club Newsletter, which keeps Auburn club presidents posted on the Alumni Association. Twenty years. There the words stood in splendid isolation. Then President Martin asked me how long I'd been with *The Alumnews*. And that re-emphasized it. Twenty years. Twenty years? No way. No way could twenty years have passed since I walked into the Alumni Office to get myself an internship that would get me out of town with a journalism degree in six months and, instead, hooked myself for a twenty-year stretch.

As the anniversaries have passed, I've thought about writing about this place and this job and I've never had time or space. This time I made the mistake, however, of when Leslie wanted something about me for the club newsletter of telling her I'd been here since I came as a student in 1964 and then having my ace reporting staff realize that that's *twenty years*. Twenty years takes on primary importance, you understand, if you're not yet twenty, as is the case of two members of the group, or are barely past twenty as the others are. (Barely past twenty means, folks, you were still in kindergarten when Kaye graduated from college.) So the kids (pardon me, but there has to be some privilege to age) decided that this anniversary would be done up right—or wrong as the case may be. It started with a kidnapping. Mine. Literally. Pillowcase over head. Ransom note left for friend on office door, telephone call allowed from the hideout. Of course, the fact that the pillowcase had War Eagle on it, that the kidnapping vehicle was a familiar green and white Maverick with Florida license plates that had sat in our driveway over Christmas and provided emergency transportation after a suicidal deer attacked Fouts' Rabbit and that the hideout was C.L. Torbetts made the whole thing less traumatic. Less traumatic probably than the comments that are supposed to be inserted in here somewhere that some of the kids have written and that I have not yet seen.

With considerable urging from the students, and although I still don't have the time or the *Alumnews* the space, I am going to commit myself to a few words about some of the people who have made Auburn and the Auburn Alumni Association so special to me over the years. Those people have come from all the groups who make up Auburn University—faculty, staff, students, and alumni. Most of them deserve a column but in the meantime I intend to say a few words about some of them. And the first installment will involve students.

Someday I'll get around to counting up how many have come here as journalism interns or student employees and—though I've now reached the age of their parents—have become my friends as well as my much-valued employees. From Richard McLean, who became my first student assistant in 1969, to the current group of interns and student writers, they have had to be the most special group of employees any alumni editor ever had.

A trio of the current crew are journalism

**WATCH THE BIRDIE**—After several tries to get *The Alumnews* staff together, Ruth Schowalter settled for this group. From left are Jennie Farrar, Mary Ellen Hughes, Mary Mason, Ruth Schowalter, and Anita Stiefel. Not pictured are Iris Dabrowski, David Benson, and Mike Jernigan.

—Photo by Ruth Schowalter

interns—David Benson, an Air Force veteran from Hell, Mich., who tells us how he got the story on the women's gymnastic team on page 9—and a bit about himself as well; Iris Dabrowski, a lovely Georgian who reflects on her Auburn years in a column called "Personal" on page 5 and then includes the third journalism intern, Jennie Farrar, in her story on working students on page 11; and Jennie, a multi-talented, very hardworking young woman who will have put herself through college when August graduation rolls around. She knows three or four languages and has so much energy that I keep wanting to siphon some off, and she has become a regular member of the staff over the past year.

The other members of the staff are student employees. First, Ruth Schowalter, whom we have been lucky enough to have for two stints on *The Alumnews*. In between them, she spent two years teaching freshman English and editing the award-winning student magazine *The Auburn Circle*. Consequently, when she came back to *The Alumnews*, she brought even more talent and experience.

Then there's Sam Hendrix, whom we are lucky enough to have back again, too—although technically, I guess he can no longer be called a student employee. For on June 15, he officially joins the Alumni and Development Office as a writer for the Auburn Generations Fund and an occasional writer for *The Alumnews*.

When she graduates in December, Mary Ellen Hughes will become the first full-fledged *Alumnews* graduate. When she began work as a shy, quiet, first-quarter freshman, none of us imagined that three years later she'd be driving get-away cars and making "the best chocolate chip cookies in the whole world," as judged by the world's pickiest eater, a 13-year-old named Brad.

The second full-fledged *Alumnews* graduate will be Anita Stiefel. Anita, despite the handicap of growing up in Fort Payne instead of up on Sand Mountain like those of us who are rarely privileged, has managed to do well at Auburn, even sandwiching in some classes among her activities as fraternity sweetheart, *Alumnews* employee, and WEGL and *Plainsman* reporter—so well in fact that she's speeding toward graduation much faster than I like to think about.

Mary Mason joined us as staff assistant last summer just after her freshman year and she gets most of the filing jobs around here—which amount

to a considerable number—but being nonchalantly willing to try 'most anything, she has written hundreds of alumnalities and a couple of stories on her favorite professors. Currently, she's trying out a new major in something called historical restoration and abandoning us to work for big bucks at a local department store for the summer. However, we hope to have her back in the fall.

Mike Jernigan '80 is the newest member of the staff. A graduate student in history, Mike determined that he wanted to be a writer but in order to get a job writing he had to have experience. So he came to *The Alumnews* and volunteered to do some stories. An Auburn football fan to rival Jerry Roden, Jr., and Sam Hendrix, he first did a story for us on Auburn's broadcast team of Jim Fyffe and Pat Sullivan and has had a story in almost every issue since. When Mary Ellen decided to spend the summer at home in Jacksonville, Fla., Mike officially joined the staff.

Before the current group of students came dozens of others: Charles McCartha '80, who just graduated from dental school; David Williams '74, sports editor for *The Valley Times-News*; Mary Myrick '83, who's in graduate school at Georgia State; Billy Leonard '76, an Atlanta lawyer; Thom Botsford '73, city editor for *The Alabama Journal*; Jan Boyd Cloninger '73, who's pursuing her first love, art; Randy McRae '82, who works for the Extension Service; Penny Pool, '80, a reporter for *The Valley Times-News*; Pat McArthur '78, with the *Mobile Press Register*; Robin Meyer '79, who now lives in Pennsylvania; Susan Burkett Mulholland '73 of Boston; David Boyett, III, '81, who's in law school; Judy Wagner '82, now in Texas; Rosy Evans Fox '80, who lives in Opelika, while Rob finishes his doctorate; Drue Price; Anne Moore '83; Glenn Eskew '84; Betsy Butgereit, with *The Decatur Daily*; Sharon Stacey Jackson, an accountant in Montgomery.....I could go on and on.

In addition to the official *Alumnews* crew there've been the unofficial ones—friends of staffers—such as Rob Pinkston, Steve Baum, and Amy Allison of the current crop or from *The Circle* staff such as Annette Norris Bradford '76, Mark Winne, Jan Cooper '76, and Margaret Renkl '84.

In fact I can hardly write about the students at Auburn without talking about the *Circle* over the years. But that's another story....

## Thanks, Kaye!

My first reaction to Kaye Lovvorn as a workshop student was one of absolute terror. I had heard stories about her... stories that would make chills run up and down the spine of students like me, accustomed to the shot-gun, news reporter style of writing. I had heard nightmarish accounts of not one but two or three rewrites needed in order to satisfy this editor! I could see the long weeks of my workshop stretching ahead of me. And I discovered that I had a lot to learn about writing quality stories, a lesson which was a very humbling experience to me and one that I carry with me to this day. Humility is a necessary ingredient for a journalist. I have learned that it is entirely possible to delete or change a typed word—just because you have put it on paper does not make the word necessary. I have also learned that the secret to good writing lies in the ability to find the perfect word to put in the perfect place... and that this takes a lot of practice and effort. In another respect, the painstaking revision of my work has carried over to my personal life, and I've noticed, in my office-mates' lives as well. I believe everyone in the *Alumnews* office has done a lot of soul-searching as a result of this examining habit we've acquired. Sometimes the discoveries are painful, in the same way that you discover that the brilliant lead you thought of is perfectly inadequate. Knowing and working with Kaye has been a valuable experience into examining the reasons why I am suddenly expecting so much more of myself, and why the deadline pressure style of writing can never satisfy me again. I would like to thank Kaye for this unwarranted piece of knowledge, and I hope everyone has a chance to work for an equally demanding and understanding editor at some point in their lives... it's good for the soul.

—Jennifer Farrar

My knees were shaking and my voice quavered as the editor of the *Alumnews* asked me into her office to interview for the position of student staff writer. Typing paper, newspapers, boxes and books poured from every nook and cranny in her office. The phone rang, people rapped on the door, and between interruptions, she appeared to be pleased with my humanities background and my essays from Mr. Stroud's class, and hired me. Thus began the process of learning how to write articles, proof-read, type alumnalities and obits, run to printers and do paste-ups—a process which came to a complete halt when someone in the office challenged a word's spelling or definition or questioned whether a lichen was a fungus. The pursuit of learning was made everyone's quest through her persistence to always know more. Since those first days, I have seen numerous journalism interns and work study students come and go. Everyone sooner or later calls her Kaye and becomes a part of the intimate chaos of *Alumnews* deadlines, classwork, and coke breaks. As well as a terrific writer and editor, Kaye is a true teacher. She has made all the difference in many of the lives of those who have worked with her.

—Ruth Schowalter

HELP!—Smothered in a pillowcase, Kaye couldn't escape her crazy staff's way of celebrating her 20th year at the *Alumnews*—a friendly kidnapping, War Eagle Style.

—Photo by Ruth Schowalter

She pops into the office looking harried, shifting from one foot to the other—nervous to leave, nervous to stay. "Hi," she says. A single word with more behind, but she seems reluctant to say anymore.

Kaye always looks like she's going someplace, has been someplace, or will go someplace—she's always got a word on the tip of her tongue, but doesn't always say it. She smiles from behind large, round glasses, friendly, open, unlike anyone I've ever worked for.

After eight years in the military and three in college, I'd run into every type of employer and instructor possible, or thought I had. Kaye is different, though. Different from the arrogant boss who remains aloof from her workers—different from the obnoxious know-it-all type who never trusts an employee. She's more than just plain folks, too.

Kaye is a human being who cares about her workers, who feels as they feel, who's been where they've been. She gets involved with all of us, leading her staff through the pond of prose, keeping us out of the deeper waters until we're ready to swim.

Writing isn't an easy job, and good writing takes an editor that is at once compassionate and knowledgeable. "I think it might be better this way," she says, letting us think about what we've written and come about to slow agreement.

Kaye is excellent as both editor and friend and, at the same time, could be an object lesson for employers around the

world. For no matter how much work piles up around us, no matter how shot nerves may be, Kaye is in the thick of things, keeping us going—letting us know that we are appreciated and that our work matters.

—David O. Benson

The first time I saw Kaye, I knew that working for her was going to be an adventure; I just didn't know how much of one. As a lost and confused freshman, I wandered through the halls of the alumni offices in search of the door with a missing "Kaye Lovvorn" sign. When I spotted the dried glue and heard the incredibly fast machine-gun tapping of typewriter keys (you couldn't imagine how fast this lady can type!), I hesitantly knocked. "Come in!" was the answer. I peeked around the door to find the most pleasant smile on a face under a head of carrot-colored hair, and beaming eyes behind big, round glasses. "Oh good! Boy, do we need you!" she said enthusiastically, and I immediately began to fit right in, especially when she told me we were both Sand Mountain girls. Even now, every time I go home, she *always* says, "Tell the mountain hello for me." Through numerous cookouts, lasagne bake-offs, ice cream cake birthdays, even through two housefires which we won't discuss, we've shared laughter and shoulders to cry on—and, of course, she's always there to lecture us on going to class.

—Anita Stiefel

A year ago I began working for the *Alumnews* as staff assistant. I was surprised at the relationship between Kaye and the other student workers. My idea of a boss was someone who was friendly to their employees but not too involved with them—not Kaye. She is happy with us when we make a good grade, frustrated along with us when the typewriter becomes possessed and won't run, always ready to go out to lunch with us, and most importantly, there for us if we have a problem. I count myself very fortunate to hold this job, and I believe the experience it has given me is invaluable. I have learned how to think more for myself, to write better, to communicate better, and that my earlier definition of a boss was very wrong.

—Mary Mason

Kaye Lovvorn is a fascinating blend of frenzied editor and ever-changing womanhood. The fact that she hasn't been smothered by the files, papers, books, proofs, and Coke cans that have flowed through her office in the past 20 years is a miracle in and of itself. I knew the first time I met Kaye that I was going to like her. Her easygoing attitude and quick laughter were a nice welcome for a first-quarter freshman. Well, three years have gone by since then, and I have spent a majority of that time in the *Alumnews* office. I haven't been here because I have this insane attraction to typing alumnalities. No, I've been here because of the unique atmosphere Kaye has created within two small offices nestled in the hollows of the campus union building. People don't just work for the *Alumnews*. They grow up here, they cry and laugh here, they learn to communicate through the written word, and they share shoulders of support from sincere friends. And at the center of all of this is Kaye.

I remember an icy February a year-and-a-half ago, when we were trying to get the paper to press in the middle of an ice storm. In the end, we took the finished pages to a bus station to have them shipped to the printers in Montgomery. There Kaye was, probably with a maximum of two hours sleep, trying to drive on the icy road to Opelika. Meanwhile I was hanging out the window hollering directions, since we couldn't see out the car windows. It's funny, you know. It seems like every issue we end up with our backs against the wall, frantically trying to make deadline. But the pressure doesn't end up on Kaye's all-student staff. Somehow, we always know Kaye is going to perform her magic—put her hands in her bag of tricks and pull out a finished issue. She takes it all on herself, from *Alumnews*, to classwork, to writing conferences, to being a loving friend. If there's one present I wish I could give to Kaye, it's a vacation. But, alas, Kaye never slows down. Just when you think you have her figured out she changes again. She's even kept her office relatively neat in the last few weeks! I've seen her change from a single to married woman, enter the computer age, go back to working on her master's, and transform fledgling freshmen to more confident, competent writers.

Kaye, you're the best, and we all love you. Because of knowing you, I am a better person.

—Mary Ellen Hughes

## Determination Keeps Auburn Gymnasts Performing

By David Benson '84

Nine injuries, nine casts. Ten girls on the team and only four able to compete. That was Auburn's gymnastics team last season, plagued with ill-luck and shoddy equipment.

Things looked different this year. There's a new floor in the gym, two new freshmen and a transfer student on the team. Things were finally beginning to look up for Tabor Medill and Women's Gymnastics until two weeks ago.

While working out on the mini trampoline, Lisa Cropinski, Auburn's best all around gymnast, landed wrong and severely injured her knee. Doctors removed all of the ligaments from the inside of her right knee and much from the other side. Cutting a muscle into strips, they reformed a ligament by drilling a hole through the bone and pushing the muscle into it, and then tying it off on the other side. She'll have scars criss-crossing her right knee for the rest of her life. And though she didn't lose her kneecap, it's hidden by a swelling that's painful to look at, let alone clean and rebandage.

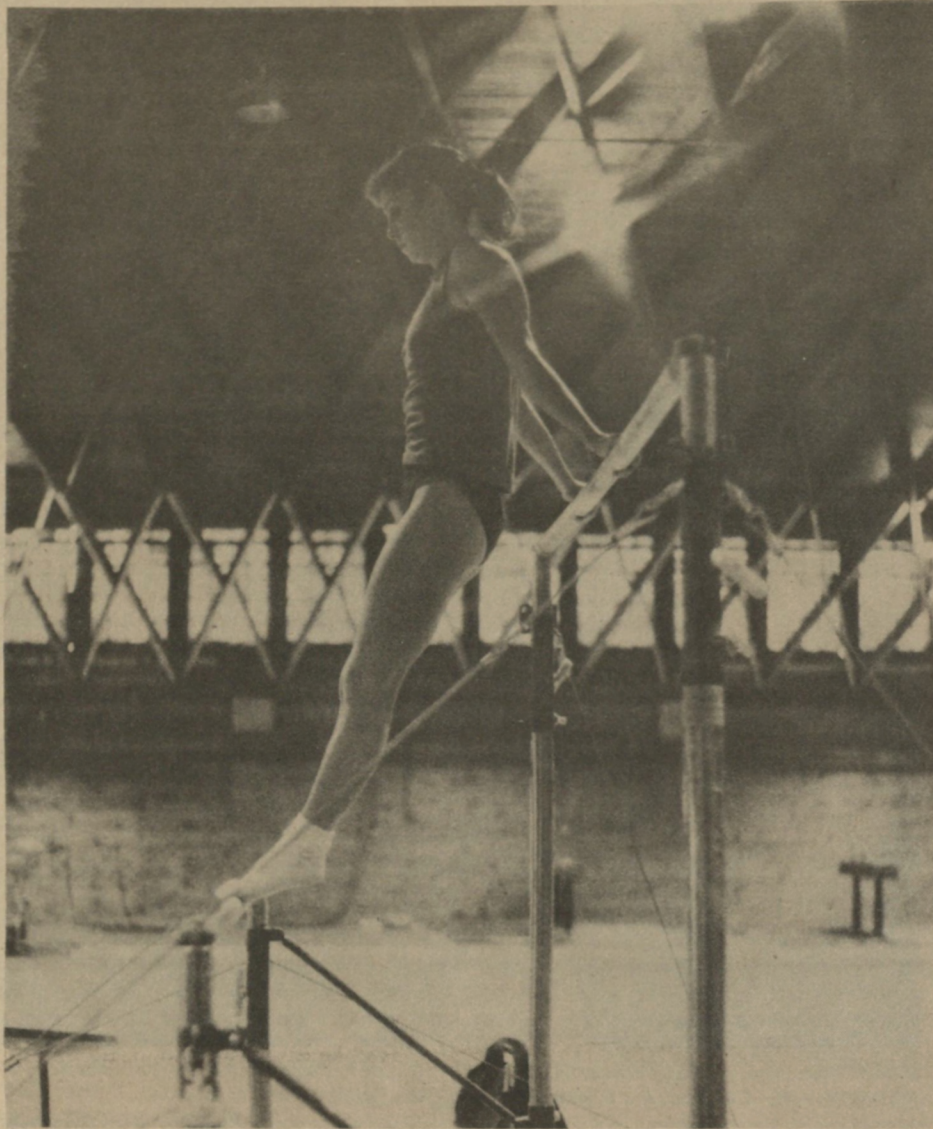

"You'll be all right," a trainer said to Cropinski.

"I don't want to be all right," she said. Cropinski gritted her teeth in pain and lifted her heavily braced leg. "I want to be a gymnast."

Gymnastics is a changing sport. In the past, it's been dominated by 12- and 13-year-old girls. Children barely into puberty competed on world class levels, as in the Olympics. Tabor Medill, a weight lifter with a lop-sided grin and an easygoing manner, is the coach of Auburn's Women's Gymnastics. He believes that things will be different in this Olympics and the ones following.

"I think you're going to see the trend change, starting with this Olympics. It's basically like swimming. Men's swimming was dominated by older athletes. Yet on the women's side, it was dominated by the younger swimmers. In gymnastics, the same thing was true. The reason the men were always older is they had a college scholarship to look forward to. That gave them an incentive to stay in the sport. But for the girls, there were no college scholarships. Men were competing under scholarships while the women were just doing it because they enjoyed it."

Coach Medill said that scholarships are a major incentive for athletes. If a man or woman is going to stay with a sport, see it through world competition, they need funding to get them through lean college years. Women, like men, get stronger as they get older and that strength makes them better at their chosen sport. In this case, gymnastics. College scholarships will make stronger teams for the U.S., both mentally and physically.

GOOD FORM—Susie Gallis hopes some day to coach her own gymnastics team.

—Photo by David Benson

Today women's scholarships are being made possible by Title IX. Briefly, Title IX says that women's sports must be supported by a college on a basis comparable to men or federal funding will be cut. Coach Medill said that Title IX will be directly responsible for building better American teams in future Olympics.

"The majority of our Olympic team this year in gymnastics will probably be made up of college gymnasts or high school seniors who are presently being recruited," he said. "That's because of the scholarships being made available to the women."

The women won't lose their grace or flexibility as they get older. Medill said that that happens only if they don't practice. A short time away from gymnastics has an effect on the performance of a gymnast.

"As long as they stay active, they maintain it," he said. "If they lay out for a month or two then it's going to be a lot of work to get the edge back."

Auburn has an edge—six young women dedicated to a sport that promises pain, tired muscles, scars from surgery, and beauty beyond belief.

There is no rarer beauty than a gymnast. A gymnast's body moves through this plane of existence smoothly, making the rest of humanity look slightly clumsy. Gymnastics can be compared to ballet. Grace, personality, interpretation of music...these and more are part of both activities. Ballet is dance, though, while gymnastics is

sport. Ballet takes place on a floor with occasional soaring leaps. Gymnastics encompasses not only the floor, but uneven parallel bars, a vaulting horse, and—probably most precarious—the beam.

"I like the beam the best because it's such a challenge to stay on a little piece of wood," said Susie Gallis. She has pretty brown eyes, expressive and animated. They flash when she talks about her sport and life. Around her right knee, a scar curls, evidence of knee surgery last year.

"I've got no feeling from here to here," she said, marking out a place on her leg. But Gallis didn't quit. She came back, fighting, working, until once again she is grace on the wooden beam. Her main goal now is to get through her own school years as a gymnast and then, one day, coach her own gymnastic team.

Toni Johnson has long strawberry blond hair, swept back into a ponytail whenever she's working out. She has a bright, vibrant smile that radiates a forceful vitality.

"You've got to be aggressive," she said. "I think of attacking the equipment. I can't let equipment rule me."

And Johnson does attack. Every move is smooth, easy, but it has an "I'm in control" attitude. She rules the beam with a graceful leg, an easy smile and concentration that never slips.

That concentration may help her in her highest goal. "I'd like to go elite," she said.

"I'd like to go to the Olympics." Toni will only be 24 in 1988, when the next Olympic games will be held. If the sport moves in the direction Coach Medill thinks, she'll be at her best in 1988.

Liz Butler, a freshman, made the varsity team in gymnastics during her freshman year in high school. She has a brooding smile that reflects the intense concentration needed for gymnastics.

"I'd say your brain is the most important part of your body in gymnastics," she said. "If you can't see the trick mentally, you can't do it. Everything is mental in this sport."

Liz has as fine a control over her mind as she does her body. Each move is precise and exact.

Patty Colbacchini is also precise and exact. She is a natural athlete, one who would be good at any sport she tried. She chose gymnastics, though.

"I like the way it's an individual sport," she said. "Even though we're a team, it's still up to the individual to do her best."

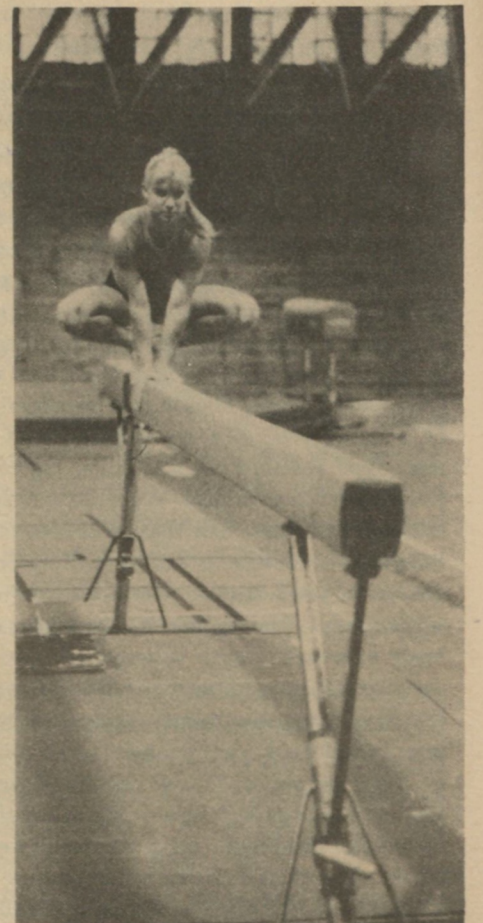

Patty does her best. Though a recent sprain stopped her training for a couple of days, she wouldn't let up. She never does. Even when she has a chance to rest, Patty works out on some part of a routine—quite often perfecting a move on the beam.

Karen Kenlin received four varsity letters in gymnastics while she was in high school. She's a freshman now and is expected to be Auburn's top freshman all-arounder. (An all-arounder competes in bars, beam, floor and vault.)

Karen's smile radiates confidence. Everything about her says "I can do this."

"You have to have confidence," she said. "Or you can't do it."

That attitude is important to Karen. If

CONCENTRATION—Toni Johnson refuses to let the equipment rule her.

—Photo by David Benson

she wasn't sure, if she doubted her ability in any way, Karen wouldn't be able to continue. It's that confidence that helps a gymnast work through pain and injuries.

Lisa Cropinski is a case in point. Injured only two weeks ago, already she's working out as much as she possibly can. Lisa is on crutches and won't walk on two legs for four months, but her drive to be a gymnast is stronger than any amount of pain.

"Gymnastics is an experience I want to tell others about," she said. "If I have kids I want to teach them about gymnastics. Someday I want to coach."

The day will probably come when Lisa is a coach—she won't settle for anything less.

None of these women settle for anything less than the best they can do or offer. No matter what is involved, no matter the pain of sprains, broken bones, torn ligaments and more, Auburn gymnasts come back for more. And Auburn is a little bit better for their dedication, because there is no more graceful or beautiful sport than gymnastics.

## Benson Answers The Challenge

By David Benson '84

It was a challenge. I don't think he meant it that way, but that's the way it sounded to me.

"We had a writer who wanted to do an inside story on the team a couple of years ago." The coach leaned back and watched the women work out on the floor for a moment. "I told him that he could work out with the team for a week if he wanted to and get his story that way." He grinned at me, a little lopsidedly. "He didn't make it through the first day."

My mouth was already moving before my brain could relay all of the information it had gathered. The stories that Coaches Medill and McClure told about bleeding hips from hitting the bars, about Lisa's broken wrist, about Susie's surgery-scarred leg, about raw and bleeding hands all flashed by, totally ignored. I've never responded well to anything that even remotely sounded like a challenge.

"I'll do it," I said. "I want the real story and I can get it that way."

Coach Medill smiled. "I'll see you on Monday at 1:30."

That's when my brain caught up with my mouth. But I still had the weekend to think about what I'd done and what I would do. I could still back out, but that challenge rang hard in my ears. "He didn't make it through the first day." Well, I would.

Gymnastics is a demanding sport and women's gymnastics (for a man) is doubly so. There are things that a woman can do that a man can't, a grace that they have that a man doesn't. A woman can lie on her side and raise both legs almost perpendicular to the floor. Coach McClure didn't tell me that a man's hips weren't meant to move that way until the last day of my workout. (Admittedly, I hadn't asked until then). But I'm getting ahead of myself.

Monday came and after classes and checking in at the newspaper, I walked over to the gym dressed in an old pair of cut-offs and a tee-shirt. The women on the team were svelte in their body suits in comparison to my slightly rotund form.

**PRECARIOUSLY IN BALANCE**—David Benson, sporting his prized Auburn gymnastics t-shirt and a new beard, mounts the balance beam to demonstrate the grace he acquired from a one-week workout with the team.

—Photo by Ruth Schowalter

Maybe I should say here that not only am I about 15 pounds overweight, but a heavy smoker, a moderate drinker, and, due to my love for journalistic writing, I stay up until 3-4 a.m. every night working on stories for one of the two newspapers I work for. None of these habits are conducive to gymnastics.

I had a heavy beard that first day and looked like a rag-a-muffin dragged off the street, but all of the women on the team were friendly and helpful. From 1:30 until 2 p.m. we talked and stretched. I did more talking than stretching, all the time marveling at how easily Toni did the splits or Karen walked on her hands. I should have stretched.

"Aerobics first," said Coach McClure. She smiled at me, a very disarming smile that said "no problem."

I've seen aerobics on television—"The 20 Minute Workout" and Showtime's "Aerobicise"—and I thought the same thing. "No problem." I was still watching the women at this time, wondering at how easily they moved, at how graceful they were. Five minutes into the aerobics I quit watching anything but myself and Coach McClure.

Coach McClure had arranged it so that I would be at the front of the class. I watched her closely and tried to duplicate everything she did, but felt the whole time like an object lesson for everyone else. "This is not the way to do aerobics," my body said, as it twisted and contorted.

Every muscle ached and my beard was stiff with sweat after the 30 minute workout. I looked around to see how the women had fared. They weren't even perspiring.

"We're going to do basics on bars and beam today," Coach McClure announced. I

looked at her dubiously, but allowed myself to be led over to the uneven parallel bars. "Show him how to do a penny-drop," she said to Lisa. Lisa got on the bars.

"It's like this," she said, neatly flipping around and landing on her feet. She motioned me onto the mat and then to the uneven parallel bars.

A penny-drop is probably the easiest move on the bars. To do it, you hang upside down from the lower bar by your knees and hold onto the higher bar. Releasing your grip on the high bar and swinging around, you straighten your legs and land standing up. At least that's the way it's supposed to work.

Lisa and Coach McClure helped me through the move the first couple of times, shoving at my back so that I could gather enough momentum to complete the half circle upside down. I landed on my knees the first time and came up red faced and resolute. "I'm going to do this," I thought. And I did, finally.

There was one part about the penny-drop they hadn't told me, though. The bar is made out of hard wood and the friction that builds up during this move is incredible. The backs of my legs were almost raw after only five tries.

"Oh, you get used to that," Susie said. "You build callouses after awhile."

I smiled weakly at her and thought about how long it would take to build up callouses that would protect my tender skin from the bar that burned. I wouldn't be there that long.

The next trick was on the beam. Basic balance. Easy stuff, until the coach told me what I had to do.

The next half hour was spent doing "easy" jumps on the beam and side to side

movements that demanded a lot more balance than I ever had—and I could ride a ten-speed bicycle at 5 years old. That didn't help though, and I spent as much time getting back on the beam as I did actually working out.

Something was happening, though. The coach and the team were encouraging me, urging me on, making me feel like I could do the things that they did. I couldn't, of course, but I felt like I could and it showed when I finally made a small leap on the beam and didn't fall off.

The encouragement made me feel a little cocky. Like I could do anything I set my mind to. Though the encouragement didn't stop, the cockiness ended with the next part of the workout—tumbling runs.

I had already made up my mind to try everything the women did, but the tumbling runs brought out my suspicious nature. "Human bodies can't do that," I thought. But every time I tried to tell myself that something couldn't be done, one of the women would do it. I did try almost everything the gymnasts did, but after landing on my face doing something called an aerial I realized my inabilities and backed out of the more difficult runs. That gave me a chance to watch again and I noticed two things: the gymnasts were beautiful in their every move, and they still weren't perspiring. Meanwhile I was less than graceful and my beard was getting crystalline with the sweat evaporating and leaving salt.

The tumbling runs ended near 4:30 p.m. and it looked like we were done for the day. "Now it's our turn to sweat," Karen said.

We weren't done for the day. We had to go over and run steps at the Coliseum. Thirty-six steps. Ten seconds going up, 15 coming down. Twenty-five times. I was thoroughly drenched by the time we'd finished. The only gymnast I could see clearly was Toni. She had a small band of perspiration across her forehead.

I finished that first day beaten, tired, and a little dispirited. Every shambling step was agony, but the words that floated back to me capped the whole experience.

Lisa was walking out the door talking to another athlete. "Boy, I wouldn't want to be a swimmer," she said. "Now they really have a workout." Every word cut into my aching body. I couldn't believe anybody worked harder than a gymnast.

That night I decided I needed a change of attitude. Something—anything that would help me get through the next three days. "The beard has to go," I thought. That night, four inches of luxurious growth fell from my chin. I felt like a new person, ready to take on the world. Of course, no one recognized me the next day and that made it odd, because the first place the gymnasts were supposed to work out was in the weight room, labeled Women's P. E. and Dressing.

I was a stranger to them that whole day and we got to know each other all over again. Shaving the beard off helped a lot on Tuesday, but every move was still a study in pain. At times I felt like vomiting, I'd worked so hard. My lungs burned from too many cigarettes and too much exercise. My body complained from a late night spent at *The Plainsman* and too little sleep. But through it all I could hear the gymnasts, words of encouragement.

"You can do it," Liz said, as I trudged up the stairs that evening.

I'd never had more welcome words. Shaving off the beard helped but it was the gymnasts that got me through the next two days.

Wednesday I showed up for practice early and saw Toni standing out in front of the gym. We talked for awhile and then I told her I had to go down to my car for a minute.

"You better not be late for practice," she said.

I felt a small lump in my throat and I croaked out a, "No, I'll be here. You can count on that." And I was, too.

Wednesday and Thursday were both harder than the first two days, but something had changed. I was a part of the gymnastic team. A small part, true, but I belonged. I'd watched gymnastics on television for years and wondered at the grace and style of those people. Now I had some idea of the work that went into every move, every thought, every interpretation of a piece of music. For one week I was a brush-stroke on a masterpiece and I loved it.

Thursday was my last day of working out and Friday there was a banquet honoring the gymnasts. Coach Medill invited me to the banquet and I went wanting to see everyone some place other than in a gym. After the meal and the ceremonies of the awards I reflected back on my experience and felt a hollowness, knowing that I wouldn't be working out with these people any longer. As I got up to leave the gymnasts stopped me.

"This is for you," they said. It was a tee-shirt with a picture of a gymnast on it and the words "Auburn University Gymnastics."

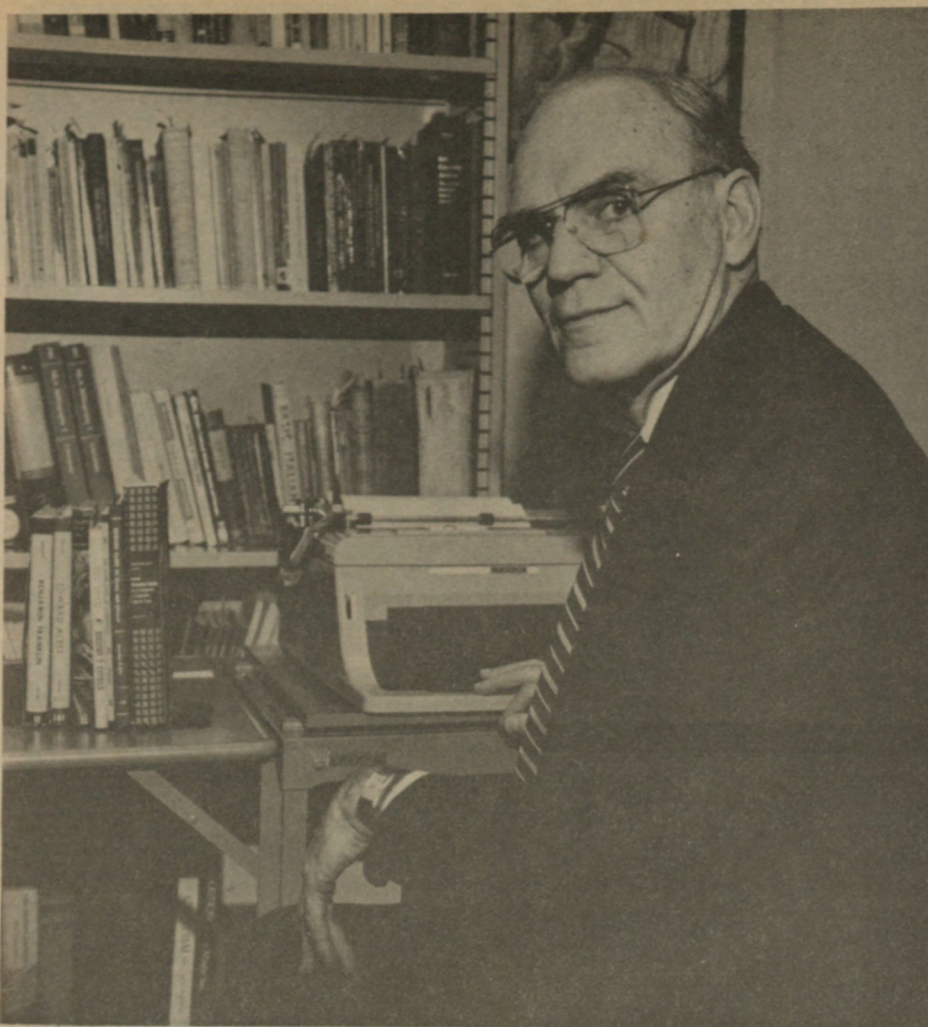

I don't know who handed me the shirt—my eyes were misted over. I tried to mumble some kind of thanks that would express how much the gift meant to me, but failed miserably. I wear that shirt a lot now, a badge of honor, a badge of remembrance, and when people ask me about it I tell them about the challenge—that-wasn't-a-challenge and the week I spent with Auburn's finest.

## Amacher Retires After 40 Years

After 40 years of teaching—27 of them at Auburn University—Richard Amacher retired March 16. In addition to wanting more time to pursue his music—he plays first violin in three symphonies—Dr. Amacher still has a lot of books he wants to read—not surprising, since his interests and publications have ranged from Aristotle to Benjamin Franklin to Edward Albee. The English professor's field is early American literature and he has a second interest in literary criticism. He has been Hargis Professor of American literature since 1978.

Dr. Amacher feels he was inordinately lucky in 1957 to join the Auburn department headed by Dr. Walton Patrick, co-author with Dr. Eugene Current-Garcia of definitive works on the American short story—a department then already enlivened by Dr. Carl Benson, legendary teacher of modern American and British literature, and enriched by the distinguished novelist Madison Jones.

In addition to the intellectual stimulation provided by the diverse faculty that Dr. Patrick recruited before and during Dr.

**RETIRED**—After 40 years of teaching (27 of them at Auburn), Dr. Richard Amacher retired from the Auburn English Department in March. He plans to spend his time completing a manuscript and catching up on his reading.

Amacher's first twenty years in the Auburn English Department, he and his wife, Anne, recall "with special gratitude Mrs. Patrick's numerous, elegant, and inclusive gatherings, which promoted an *esprit de corps* in the constantly growing department."

Dr. Amacher has been publishing since 1946 and is the author, editor, or co-editor, of eight books: *Franklin's Wit and Folly: The Bagatelles; Practical Criticism, Benjamin Franklin; Joseph Glover Baldwin's, The Flush Times of California; Edward Albee* (also published in Spanish in Argentina); *Edward Albee at Home and Abroad: A Bibliography; New Perspectives in German Literary Criticism: A Collection of Essays; and American Political Writers, 1588-1800.*

In addition, he has 64 articles and reviews in scholarly journals. A poem, "The Cyclotron," written in 1940, was co-winner of the John Billings Fiske Poetry Prize and was published by the University of Chicago Press.

The first draft of a manuscript on anti-slavery literature prior to 1808 is finished, and Dr. Amacher will work on that during the next year.

"I also have a lot more reading to do," he says. "Literature is such a big place. I haven't finished Dickens' *Bleak House* yet and there is much more literature and drama I want to read."

He also plans to write book reviews.

There'll be more time for his chamber music quartet group, too. Not a professional group, they play for their own enjoyment. As a member of the Montgomery Symphony, the Huntsville Symphony, and the Auburn University Symphony, Dr. Amacher plays some 15-16 concerts a year.

Other interests over the years which will continue to claim his time are the Presbyterian Community Ministry of which he is currently vice president; the International Center Board which has been working for

an international house for several years, and the Auburn Chamber Music Society of which he has served as chairman.

"I'm a Democrat and a liberal," he says. He remembers when liberals at Auburn were on the defensive when he and his wife were early members of the Alabama Council on Human Relations. They speak warmly of the "farseeing editorials and news stories of *The Auburn Bulletin* under the owner-editorship of Neil and Henrietta Davis."

Dr. Amacher joined the Auburn Department of English faculty in 1957, after teaching at the Carnegie Institute of Technology, Yale University, Rensselaer Polytechnic Institute, Rutgers University and heading the Henderson State College English department.

He holds the A.B. degree from Ohio University, attended the University of Chicago and earned the Ph.D. degree from the University of Pittsburgh. In 1961-62, Dr. Amacher was a Fulbright Lecturer in American Literature at Wurzburg University, West Germany, and in 1969-70, was a Fulbright Lecturer in American Literature at Konstanz University, also in West Germany. In 1972, he received a grant from the American Council of Learned Societies for expenses in translating and preparing the manuscript, *New Perspectives in German Literary Criticism*, published by the Princeton University press with an introduction by co-editor Victor Lange, emeritus head of the Princeton German Department.

Dr. Amacher organized at Auburn in 1977 a five-state conference of the Southeastern American Studies Association on "American Political and Social Satire." A monumental success, it cut across a variety of disciplines, media, and themes in American satire.

In 1976, he served as one of the invited conferees for the Williamsburg, Va., worldwide conference of scholars in observance

of the 200th anniversary of the United States.

Dr. Amacher is married to Dr. Anne Ward Amacher and the couple have one daughter, Alice Marie, who is married to Richard Brantley. She expects to graduate from medical school at the University of South Alabama in Mobile in June.

## Auburn Placement Service Helps Students, Alumni

By Ruth Schowalter

Whoever heard of the book *Jobs for English Majors and Other Smart People?* Sound ridiculous? The liberal arts major graduating from college might not think so. As business and engineering majors clamor for interviews fall, winter and spring quarters, the history, English, and philosophy majors hang their heads in shame like perennial bad boys who played hooky from school and got caught. Without directly marketable skills, how does the liberal arts major begin the job search? The Auburn University Placement Center caters to specific students' needs whether the student is a nutrition or an English major as he prepares to enter the work force.

Too few students and alumni are aware of the sanctuary on the fourth floor of Mary Martin Hall where all those seemingly enigmatic questions about resumés, interviewing skills and leads to prospective employers are demystified. "There is nothing magical about readiness for making the transition from college life to your professional career," says Elva Bradley, coordinator of placement. "Just as you have spent valuable hours acquiring academic preparation, you must now devote attention to employment search skills." As an English graduate student, I have rarely given a thought to the prospect of "marketing" myself. I refused to think of myself as a commodity needy of promotion in order to make a "sale" to a much desired employer. However, after a visit to the placement center and one hour meeting with Ms. Bradley, I decided that I had viewed the job search process unfairly.

Ms. Bradley greeted me with a smile and immediately handed me a blackbound notebook opened to a job prospect in Birmingham. I had scheduled the appointment earlier in the day and during lunch she had scanned the job openings in Alabama, marking with paper-clips possible leads for me based on the little information I had given her over the phone about my academic background and work experience. I looked at the job qualifications and shook my head in embarrassment—I couldn't do a job that required such a diversity of skills and experience. Ms. Bradley nodded, explaining that an employer lists the ideal qualifications for the position he needs filled but realistically will settle for someone with only some of those qualities. That made sense!

She began suggesting a variety of jobs for which I could adapt my past experiences to meet some of the job specifications. The opportunities were endless. Possible avenues such as advertising, public relations, writing copy for a radio station waited to be explored. But Ms. Bradley

emphasized that I had to be aware of my abilities, creative in my search, and confident in my interactions with prospective employers. And she shared my enthusiasm as I realized that a destiny behind a counter in a hamburger joint was not the only career that awaited me, a liberal arts major.

Ms. Bradley expertly channeled my excitement into a practical discussion of the rudiments of the job search. Instead of appearing as some horrific nightmare, the search process can be simplified, she explained, by breaking it down into various tasks. The first task, however, is the most trying of them all. It is synonymous to that age-old adage, "know thyself." The placement center manual provides some helpful questions that anyone launching himself into a career should be able to answer: "Can you state your career goals? Can you explain why you chose your major? Can you describe your greatest weaknesses and strengths? And can you list at least five job skills and abilities that you have?" As a pilgrim seeking a satisfying route to a career, every student must assemble a hodge-podge of personal qualities and desires so that he will know how to depict himself in a resumé, what type of work he would like to do, and how he can communicate these reasons to the interviewer who is trying to select one employee from among the multitudes.

After walking over the burning coals of self-analysis, the job hunter's next task is to acquire a new set of manners. I had always considered this aspect of the job search to be in the category of white lies. The idea of preparing the face to meet the face of the interviewer seemed artificial to me somehow, like creating an appealing facade at the expense of verities. For instance, to demonstrate involvement in activities one might transform an informal poetry group into a campus literary society. However, translating experiences as precisely as possible to black and white terms are a matter of etiquette, not one of artifice, keying prospective employers into your abilities. Pamphlets, books, and periodicals on these topics, hoarded in the placement center, are waiting to be probed by anyone seeking

the code of behavior for the work-a-day world.

After a reasonable understanding of these procedures, the job hunter must do some research and make some choices. Ms. Bradley encourages students to aim for what they really want, not for what they can easily get. I had not realized there was the possibility of identifying the companies one would like to work with and the jobs he would like to perform within these companies, as well as selecting the geographical location where he would like to work. Of course disappointments are inevitable, but there is the satisfaction of having tried to get precisely what you want which makes second and third choices more acceptable. The placement center keeps a notebook with current job openings in Alabama, a catalog listing companies who recruit particular majors from the Auburn campus, bookcases filled with binders from a variety of corporations describing their business and defining their needs, and many other treasures. Days could easily be spent in the placement center library searching through all the materials provided for graduating seniors and alumni.

In order to insure time well spent, Ms. Bradley and Nancy Bernard, placement associate, provide direction and reassurance to the student for whom starting a career can be frightening and overwhelming—especially for the liberal arts major whose transition from academics to the working world seems more than a little vague. The Auburn Placement Center is there to assist all students overcome the obstacles which inevitably appear along the jaunt to a first job. The English major and his fellow liberal arts majors can stand in line along with the other more practical majors and take advantage of placement services, perhaps exerting a little more effort to define job abilities and possible routes to employment. "In today's highly competitive job market," counsels Ms. Bradley, "the margin of difference for success is preparation."

## Dean of Students Barnes Feels Lucky To Have Job She Loves

By Jennifer Farrar '84

My first impression was that I had stepped into the wrong office. Surely, I thought, the secretary outside had sent me to the lounge or a waiting room. The bright green overstuffed chairs were just not the type of chairs I expected to see in the Dean of Students' office. Instead of ancestral portraits weighting neutral-toned walls as in most other university offices, a bright parade of butterflies, flowers and spring prints marched along the yellow and green wallpaper. Another surprise: the tall blonde with the contagious laugh was the actual Dr. Pat Barnes, Dean of Students. I had been expecting a very stern matron stooped with tradition and formality. As Dr. Barnes sank into a fluffy chair and swung her legs up on a chairstool, I realized my initial mental image of the first female Dean of Students was very wrong.

She laughed when asked if all the offices in Cater Hall looked so comfortable, and went on to explain that as the only female in the building with her own office, she likes to keep a "woman's touch" about the place. "I like soft things, and students enjoy coming in because it's so comfortable. I like students to feel at home."

Dr. Barnes' concern for people is an innate characteristic. Although she started out as a high school mathematics teacher, her interest in dealing with counseling students came about when she acted as a counselor at a high school in Smith Station in the late 1960's. When her husband, Dr. Benny Barnes, was offered a job at Auburn, she decided it would be "really fun to have a degree in counseling," and so enrolled in the Auburn graduate school in education in 1964.

Upon receiving her master's degree in education in 1965, she and her family moved to Virginia, where she became a counselor at a Blacksburg High School. After another move to Knoxville, Tennessee, Dr. Barnes decided to pursue her doctorate, and enrolled in the University of Tennessee's Educational Psychology program in 1969. She then realized that "when you're married, you can't make decisions in a vacuum. You try to recognize each other's rights, but you can't anticipate the magnitude of the impacts." As a parent, she became concerned that perhaps she was neglecting her family duties due to her career pursuit.

Striving to maintain the traditional family unit, she set ground rules for herself. She decided that while she was at school, she'd study, but once at home and with her young son Doug, she would put all her work aside and spend time with him. By keeping a constant eye on the impact her career would have on her husband and child, she was able to appreciate them as a family unit, and make the time spent with them more of a question of quality than of quantity. Her husband took the same attitude, and eventually her son Doug did as well. "Each of us as individuals have pursuits. As three, we have a common goal, which is that the family goal is very important, and that the individual's goals should not be disruptive to the family role."

When another change in her husband's career came about in the form of a job offer at Auburn University, Dr. Barnes stopped her studies at the University of Tennessee and decided to continue at Auburn University, remembering that "each woman who is pursuing both a family and career life must have support, as well as a desire for the traditional family unit." She honestly admits, "I never even considered that I had an option. I felt it was my duty to go with my husband and family." She adds that, "If I were now in the position I was then, I believe I might have tried to finish up my doctorate. As it turned out, however, I haven't any regrets whatsoever."

Dr. Barnes received her doctorate in 1974 and then remained in Auburn, working in the Counseling Center as a counselor. In 1980, she became Director of Student Services, in charge of coordinating all counseling activities. In the Fall of 1981, she became assistant dean of students, and in December of the same year, she was acting dean of students. Finally, after 18 months, Dr. Barnes was named Dean of Students.

"She shot up like a cork!" laughs Henry Henderson, legal advisor to students. He

DEAN OF STUDENTS—As Auburn's first woman dean of students, Dr. Pat Barnes brings a lighter touch to dealing with student problems.

—Photo by Jennifer Farrar

has known Dr. Barnes for about ten years. As a former vice-president he's in a position to know and, he says, "Pat is a competent executive, as strong as any executive I've ever worked with."

Now that Dr. Barnes is the official dean, she feels a "greater sense of responsibility." She remembers her days as acting dean with humor. "Talk about on-the-job training!" she laughs.

Now that her son, Doug, is a high school senior and does not need her close by at all times, Dr. Barnes finds time to dedicate to activities outside her busy official schedule. She is active in several professional associations and campus activities and is an Outstanding Member of the American College Personnel Association, current president of the Alabama College Personnel Association, and as a co-advisor for Talons, a junior honorary society. She is also an avid football fan, and attends as many games as possible.

Dr. Barnes says she feels very fortunate to "have a work I deeply love and that I've grown into." She extends her feeling of responsibility and tradition to the campus, on a larger scale. She believes that students "are the only Auburn University some will ever know. You have an unwritten responsibility to the University. As students, you are an extension of the University."

In contrast to her serious view of responsibility to Auburn from students and from herself, she goes about the job with a sense of humor that adds perspective to her views, and that lightens the atmosphere. Someone once criticized Dr. Barnes of being "like a butterfly who flits from one thing to another." Instead of being offended, she found inspiration in the analogy. "I have always admired the beauty and symmetry of the butterfly," she says, and adds that besides being aesthetically pleasing, butterflies "are productive—they have a reason behind their constant movement. They have a motive and a purpose, and they can accomplish a great deal." As Dean of Students, Dr. Barnes has the unique ability of finding the butterfly in most any situation and in any person.

## School and Work Juggling Act For Students

By Iris Dabrowski '84

The working student is not difficult to spot in Auburn's classrooms. He is sometimes late, sometimes tired or disheveled looking. The working student is sometimes the individual who knows all the answers, and sometimes he is the one who dozes in class. The working student attends Auburn because he wants an education and is willing to provide for it.

Each year, students have more difficulty in meeting the costs of attending college. According to Auburn's Student Financial Aid booklet, approximately 50 percent of the students enrolled at Auburn receive assistance of some type through the University. This percentage excludes the great number of students who find jobs without the University's help.

While attending college is generally an enjoyable and certainly rewarding experience, it can also be a rigorous and demanding one. The challenge of studies, social life, and adjustment to one's environment is intensified by the pressure of a job. The working student, out of necessity, has to be a skillful juggler of time, energy, and patience.

The types of jobs students take are varied and sometimes unusual because of their urgent need for funds. Local restaurants and stores hire many students. The staffs of these establishments consist of a great number of eager young people who frequently must sacrifice study, free and rest time to maintain their jobs. They seldom make over minimum wage and their jobs are not always accommodating to their class hours.

Jennie Farrar, a senior in journalism, has had 12 jobs since she began college. She has worked as a waitress, a bartender, a launderer, a telephone sales person, a translator, a housekeeper, and a gas station/quick service store attendant. She is completely self supporting.

By now working and going to school seem natural to her. "I have to work or I go

crazy. School is not enough for me. I got used to working when I found out that I had extra needs, like a car, for example. Besides, working bolsters your ego. It makes you see that anyone can work, anyone can make it. Working gave me confidence, it made me see that I could rely on myself," she said.

Work also teaches humility. Some students feel that an education is something owed to them by their parents, but sometimes parents cannot afford to send their children to school. Students then learn quickly that there is only one way to get that education and that is to pay for it themselves. Mark Jones, a sophomore in business, feels he has matured since he began working. He said, "Growing up, I pretty much had what I needed. My parents aren't wealthy or anything, but they provided for my needs. Still, when I came to Auburn to go to school, the out-of-state tuition made things real tight, and I knew that I had to work or not go to school. It kind of opened my eyes. I work in Opelika at Diversified Products, and there aren't a whole lot of students there. The people I work with are making the same money I am, but they're providing for families. It makes me realize that just because I go to college doesn't make me a better person, just a luckier one."

Although working while attending college can be rewarding, it can be emotionally taxing also. Faye Costis, a senior in accounting, found her job as a cocktail waitress kept her up so late at night that she often slept through her class the next day. "I used to worry to death because my absences would get so out of hand. I could keep up with school on my own okay, though I knew I'd do a lot better if I just went to school instead of working too. There's just not time for everything! Once I avoided a professor because I knew he'd ask about my absences, but when we talked about it, I found out he knew I worked, and he was pretty sympathetic because he'd worked his way through school too. It made me feel so much better," she said.

One of working students' biggest frustrations is the lack of leisure time. School and work are their most important priorities, and there is limited opportunity for anything else it sometimes seems. "I get jealous of people who go on about how bored they are because they have nothing to do. Sometimes I get lonely too. I've found that because they can understand the strange hours, most of the people who are my friends now work also. There aren't a lot of guys who understand why I can't go out on a date until nine or ten o'clock," said Carol Lambert, a junior in business who works part-time as a sales clerk.

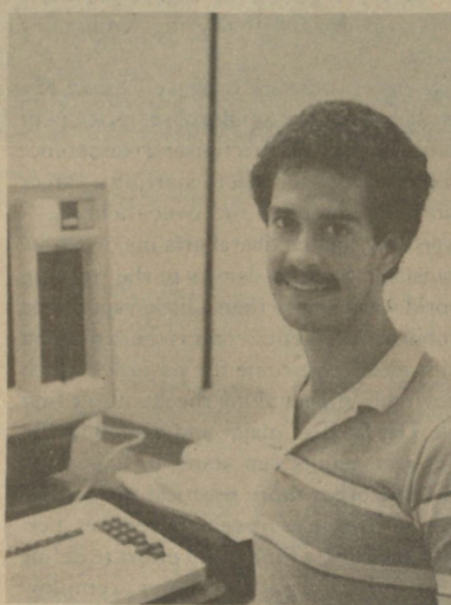

Along with strange hours sometimes come strange experiences. Jennie Farrar remembers a night, while working at a quick service store, when a car full of inebriated individuals crashed through the store's front window. On another occasion, some girls pumped gas into their car and then drove away without removing the gas nozzle. While working as a cocktail waitress, Jennie remembers embarrassing herself once when she chased some customers all the way to the parking lot because she thought they had not paid their tab, only to find out they had cleared it with the bartender previously. "Working has taught

me to cope. I've learned to be more tolerant of people, and I can read them better too," she said; "it's helped me in school some too. Oral presentations don't bother me at all."

Although Auburn cannot provide for all its students, it does help half of them through financial assistance in the form of scholarships, loans, student employment, and work study.

The attractiveness of grants is that they do not have to be repaid. The competition for scholarships is strong; the awards are based on grades, test scores, extracurricular activities and needs. Although not as attractive because they must be repaid, loans are nonetheless helpful, with repayment and accrual of interest beginning six to twelve months after leaving school. The university provides opportunities to those who wish to work part-time and payment is made to the student for the work he performs.

Jobs vary on campus, according to Nell Moore, personnel specialist for Auburn's

**LEARNING**—Pat Zumbado, a junior in international business, has found that his job on campus has given him another family.

Student Employment and Work-Study Program. "We have students working in capacities ranging from animal caretakers at the Vet School to typists at the Pharmacy School, to food servers in the cafeterias," she said. Students' wages range between \$3.35 and \$3.50.

Work-study and student employment are two different forms of student aid. Work-study hires students based on their financial need. Effort is made to provide work for them that is somehow related to their field of study, and work hours are maneuvered around the students' schedules. Paid monthly, these students are given a certain number of hours of work depending upon their financial need. The federal government pays 80 percent of the work-study salary, and Auburn pays the remaining 20 percent.

Pat Zumbado, a junior in international business, worked in a fast-food restaurant before he applied for work-study. Presently, he does clerical work for the Special Education office. Among his duties are: typing, working with teachers, administering tests and running errands. "I love it where I work; it's like another family. I much prefer working for the University, I mean, the hours are great, they work

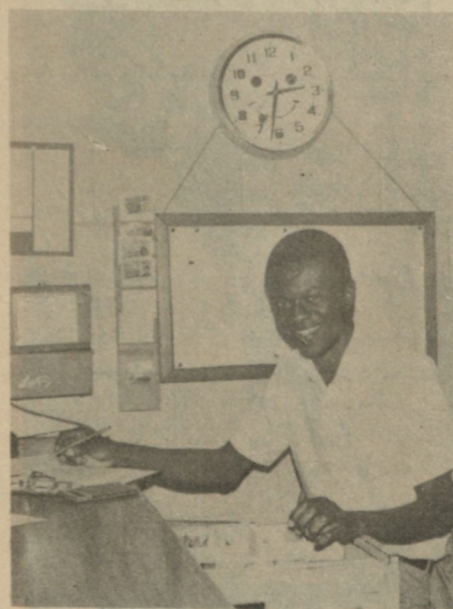

around my schedule. There's a lot more personal involvement." Pat feels he has learned something as well as earned money. He said, "I've learned a lot about handicapped people that I never knew before and probably would have stayed ignorant about. I have a new respect for them."

Differing from work-study, student employment jobs are not based on financial need and offer positions in all capacities available on campus. In order to obtain a job through the University, any student can fill out an application available at the Financial Aid Office, but must update it every six months to be considered for employment. According to Ms. Moore, the Financial Aid Office is in the process of computerizing its files and then it will be easier to determine which students have what skills, such as typing and office skills, so they can be more quickly processed.

Samuel D. Andrews, a senior in speech pathology and chemistry, works with student employment at the Foy Union desk, where he answers the phone and provides the general student population and any visitor to the University with information. Having worked two quarters, he enjoys his job. "I like it here because I get to meet everybody, it seems like it anyway!" He specially likes working during the football season, when he's very busy and the flow of alumni and students is so great. He also likes it that the job is not physically demanding, and so does not affect his school work.

Unfortunately, some students have a difficult time balancing school, work, and play. Sometimes they find that something has to be forsaken. When asked what the Financial Aid Office does when students find the school-work load to be too much, Ms. Moore said, "We permit students to drop out of whatever work program they're in, in order for them to maintain their studies. Usually, they resume their work later or next quarter. It is required that they be enrolled in school to qualify for the program, however."

Those individuals who remember the rigors of being a working student probably breathe a sigh of relief now that it is all past. The number of working students on this campus is large. They are hard-working examples of individuals who value education and the rewards it eventually provides.

**UNION DESK**—In his job with the Union, Sam Andrews provides answers for visitors to campus and change for students in the game room.

## Cassidy Named to 1984 Jr. Davis Cup Team

By Mel Pulliam

### Sports Information

If Auburn tennis player Dan Cassidy is across the net from John McEnroe in a tournament this summer, it may not mean much to the world's best tennis player but it will mean almost everything in the world to Cassidy.

The possibility of playing McEnroe and other top pro tennis stars—perhaps the dream of every collegiate player—exists for Cassidy because of his selection in late May to the nine member 1984 U.S. Junior Davis Cup men's team.

Members of the team will play individually on the United States Tennis Association's satellite circuit and the Grand Prix circuit around the U.S., from the first week in June through early September.

"I'm looking forward to it," says Cassidy, a senior from Hollywood, Fla. "In the tournaments we'll be in, we'll go up against some of the top players in the world—the McEnroes and the Connors. That's where I want to be—to have the chance to play against the best.

"It will be good for me because of the competition and the practice time I will get against a lot of great players. Although making All-American is an honor, I think I'd rather make this team."

Cassidy has done both. He is Auburn's only two-time tennis All-American, having been selected for that honor in 1982 and 1984.

Auburn's No. 1 singles player those two seasons, Cassidy had a 28-13 record this year. It included victories against eight of the top 14 players in collegiate tennis.

"Dan has earned the right to be on the team," said Gil Roberts of Savannah, Ga., the chairman of the team's selection committee. "He was seeded sixth in the NCAA singles tournament and he is a very fine competitor. He is a promising young player who will fit right in with the others selected for this team."

The invitation to play for the team came at the recent NCAA singles tournament. "I knew they were at the NCAA, looking at players and following what I was doing," Cassidy said. "I thought I had a pretty good chance, because I had done well against some of the players they had already asked."

Cassidy's coach, Auburn's Hugh Thomson, agreed with the committee's selection of his player. "If you look at his record during his career at Auburn you can see that Dan has proved he is one of the best players in college tennis," Thomson says. "He may not have been as well-known as some of the more publicized players, but the players know who he is because they have had to play against him.

"Being chosen for this team is an honor that not many players receive. I know he is excited about making the team."

In addition to playing on the two circuits—with all expenses paid by the USTA—members of the team will have an oppor-

tunity to be selected for other exhibitions and tournaments.

Two members will assist as practice partners for the U.S. Davis Cup team which will train in Atlanta, Ga., in mid-July. U.S. representatives for the Galea Cup matches in France and the 1984 Olympics in Los Angeles this summer also will be chosen from the Junior Davis Cup men's squad.

Other members of the team are Lawson Duncan of Clemson, Ted Farnsworth of Princeton, David Goldie of Stanford, Jeff Klaparda of UCLA, Michael Kures of UCLA, Ricky Leach of Southern Cal, John Ross of SMU and Todd Witsken of Southern Cal.

## Tennis Team Makes Top Ten, Wins 2nd SEC Title

Auburn's first top 10 ranking, its second SEC title, and its second appearance in the NCAA tournament highlighted the Tigers' 1984 tennis season. Coach Hugh Thomson's third Auburn squad produced a 27-11 record playing what he called "the toughest schedule in the nation." Of the 38 matches the Tigers played, 26 were against teams ranked in the top 25. Auburn had 15 victories against ranked teams and seven of its 11 losses were to teams ranked in the top 10 at the time.

Thomson says his 1984 team ranks ahead of any of the others he has had in six years as a collegiate coach.

"This is the best team I've had," he says. "The depth is what made this team a little different than the others. We were stronger all the way down the line in singles, as well as doubles. No one could count on any easy victories when they played us.

"We had a good record considering the schedule we played," he added. "We set a lot of new standards, had a lot of 'firsts' at Auburn this year."

Auburn finished the season ranked No. 8 in the final poll by the Intercollegiate Tennis Coaches' Association, after being as high as No. 7 during the season. It was Auburn's first appearance in the top 10. The school's highest ranking prior to this season was in 1981, when the Tigers ranked No. 12.

Receiving its second invitation to the NCAA team tournament—the first was in 1981—Auburn defeated Texas, 5-4, to record its first victory there. The Tigers lost in the second round to No. 1 seed UCLA, 5-2, which went on to win the national title.

In the SEC, Auburn became the fourth team in conference history to win back to back titles. The Tigers had champions in five divisions, the most in school history in one season.

Thomson indicated the success of this year's team has given Auburn new visibility on the national collegiate tennis scene. "I think what we have done this year has established our tennis program on the national level. We had a good year last year,

but we were like the new kid on the block. This year, we proved we can compete with anybody in the top 10.

"Our success this year has created a lot more interest in our program, especially from a recruiting standpoint," Thomson continued. "A lot of the top junior players in America are inquiring about our program now. Two years ago, most of them didn't know anything about Auburn and had little interest in visiting our campus. It's different now."

## Cochran Resigns As Associate AD

Dr. John Cochran '66, associate athletic director for the past three years, recently resigned to return to fulltime teaching and research with the School of Engineering. He has maintained his professorship while he held the athletic post.

Oval Jaynes, assistant athletic director for administration, will become associate athletic director.

"John has made a tremendous contribution to our athletic program in the time he has served as associate athletic director," said Pat Dye, athletic director and head football coach, in announcing Dr. Cochran's resignation and Mr. Jaynes' appointment. "Whatever success we have enjoyed is due in large part to John's efforts. That is especially true in the improvement of our facilities and our financial standing. John has been described as the consummate Auburn man," Dye said, and "that is certainly an appropriate description. We appreciate all he has done for our department and we wish him well in his return to the academic area."

## Six Football Players Join Pro Teams

By Mike Jernigan

Six members of Auburn's 1983 SEC championship team will be donning new uniforms this fall as members of teams in the National Football League, joining an already impressive list of former Auburn stars in the NFL and USFL. Defensive linemen Doug Smith and Donnie Humphrey were the first to be picked, Smith in the second round and Humphrey in the third. Smith, an All-SEC and All-America selection at tackle for the Tigers last year was drafted by the Houston Oilers. Smith had originally been projected as a first round pick, but an off-season weight problem lowered his standing somewhat. Still, Smith said he was not disappointed by the draft's outcome.

"It feels very good to be drafted in the second round," he said. "I can visualize playing nose tackle. They said they needed help there, but it really doesn't matter where I play."

Humphrey, who came off a 1982 knee injury to help lead the Tigers to the title in 1983, was the next Auburn player drafted, taken in the third round by the Green Bay

Packers. In Green Bay, he will rejoin former Auburn Strength Coach Virgil Knight, who recently left the Tigers to take over the Packers' strength program.

He was followed in the fifth round by one of the most popular players ever at Auburn, "Little Train" Lionel James, who was drafted by the San Diego Chargers. In San Diego, James will rejoin former teammate James Brooks, who has become one of the Chargers' leading rushers since leaving Auburn in 1981. Lionel leaves Auburn as the Tigers' third ranked all-time rusher with 2,068 yards to his credit.

The fourth Auburn player to be taken in the draft was linebacker Jeff Jackson, taken by the Atlanta Falcons in the eighth round. Jackson, who moved from defensive end to linebacker just last season, was Auburn's third leading tackler in 1983. A native of Griffin, Ga., he will be playing close to home with the Falcons.

The final two Auburn players drafted were both linemen. David Jordan, an All-SEC offensive guard who graded out a winner in every game last year, went to the New York Giants in the tenth round. He was followed in the eleventh round by noseguard Dowe Aughtman, the Tigers' fourth leading tackler in 1983, who was taken by the Dallas Cowboys.

## Nix Resigns As Baseball Coach

Broun Hall was not the only Auburn institution to close out a long and distinguished career of service to the university recently. Paul Nix, Auburn's head baseball coach for the last 22 seasons, announced just two games before the season's finale that this year would be his last.

Coach Nix, whose teams have fallen on hard times recently after enjoying great success in the late Seventies, cited the need for a change as the primary reason for his decision.

"Baseball has been a part of my life for as long as I can remember," he said. "I love the game and all that goes with it, but there comes a time when you want to move on to new challenges and new opportunities. There are some things I want to do away from baseball and this is the time to do them."

If Coach Nix enjoys the same success in his future endeavors as he has on the baseball field, his should be a thriving retirement. Nix bows out as the undisputed dean of SEC coaches with a career record of 604-414-1. Of those wins, 524 came during his stint at the Auburn helm.

During that time, Coach Nix also took the Tigers to four SEC championships and two College World Series. "We've been fortunate to enjoy some good years and good times these last 22 years," he said. "Those memories and the people who made it all possible will be a part of our lives forever. There's no way we can express our appreciation to the players, coaches, and fans who made it all happen."

Although Coach Nix is giving up the Tiger helm, he expects to become an avid follower in the stands and expresses optimism about Auburn's baseball future. "We had some good years, but Auburn's best years are yet to come," Coach Nix said. "Interest in college baseball is growing almost daily and we are fortunate that Coach Dye has made the financial commitment we need to recruit and compete with any program in the nation."

## Griffin Named Golf Coach

Mike Griffin, coach of NCAA Division II national champion Troy State, has been named Director of Golf at Auburn. Griffin, whose Troy State team won the national title a week before being named to the Auburn post, will begin work at Auburn immediately.

"We wanted to go after the best available golf coach in the country," said Athletic Director Pat Dye, "and we are very fortunate to have a man right here in our area who is everything we could hope to find."

"Mike is a proven winner. His record indicates that. He holds a Class A PGA card and you can't help but be impressed with his thoroughness and his professionalism in everything he does. He will be a great credit not only to our athletic department, but to our community as well. We are very fortunate to have Mike joining our staff."

Griffin will oversee the men's golf program and women's program which will be reinstated as a competitive varsity sport in the fall of 1985. He will also oversee the growth and development of Auburn's program, including a series of summer golf camps.

In addition to being head golf coach at Troy, Griffin has also been the head golf professional at Trojan Oaks Golf Course in Troy. His Troy State teams have won three of the eight NCAA Division II championships held. A native of Thomasville, he played competitive golf at Troy State. He graduated in 1970 with a degree in education.

"I am very pleased and happy to be coming to Auburn," Griffin said, "and I look forward to getting on with the opportunities at Auburn, but this was not an easy decision. Troy has been good to me and to my family over the years. It has become home to me and we will always have some of Troy in our hearts. From the standpoint of my career, I knew the day would come when I would have to move on to a competitive program in Division I and I am most fortunate to be going to Auburn. Coach Dye is genuinely interested in all sports and his commitment to an overall championship program is one of the key factors that influenced me to make the move."

"Auburn has won some SEC championships in the past and there are several Auburn players on the pro tour now. The players at Auburn now give us a good nucleus to start from. I look forward to the challenge of winning championships at Auburn just as we've been fortunate to do at Troy," Griffin said.

Griffin replaces Dr. Anthony Dragoin who coached Auburn's golf team on a part-time basis for 25 years. Dr. Dragoin, now teaching fulltime, continues to serve the athletic department on an advisory basis.

## Asmuth Signs Six Swimmers

Six high school swimmers, four women and two men, have signed grants-in-aid to swim for Auburn next season.

Kendal Stone, a two-time Texas high school state champion in the 100-yard breaststroke, heads the women's signees. Stone is from Austin, Texas, and holds one of the nation's best times this year in the 100 breaststroke. She swam for the Longhorn Aquatic Club, coached by Randy Ernst, and attends Georgetown High School.

Two of Auburn's recruits, Dotty Linsemeyer and Kandis Perry, are members of the same swim team, the Michiana Marlins in Indiana. Perry, from James Whitcomb Riley High School in South Bend, Ind., is a butterflyer and freestyler who was named the Outstanding Female Swimmer for the state of Indiana in 1983. At the 1983 Sports Festival Perry registered third and fourth place finishes in the 100 butterfly and 400 freestyle, respectively.

Linsemeyer, from Michigan City, Ind., won the Indiana state championships in the 100 backstroke as a sophomore and as a senior. She has finished 15th in the Senior Nationals meet in the 100. The two women were coached by Tony and Karen Knowles as members of the Marlins.

Katie Heyburn of Atlanta, Ga., is a fine all-around swimmer who rounds out the women's signees. She holds 11 Georgia state swim records swimming the individual medley, breaststroke, and middle distance freestyles. This year she has qualified for nationals in six events after winning the 200 breaststroke at the 1982 junior nationals. Heyburn attends Lakeside High School and swims for coach Pat Hogan's Dynamo Swim Club. Current Auburn swimmers Richie Hughey and Sandy McIntyre are past members of the Dynamo Club.

"All of the women we signed have the possibility of stepping in and being of immediate help to our team," head coach John Asmuth said of the four women recruits. "All of them have swum on the national level during high school and are continuing to improve."

"This group that we signed will form the nucleus of our team for the next four years. If they continue to improve like I think they will, they will excel on the national level and will be exciting to watch during their college careers."

The Tigers' two men's recruits are Rod Bowman, of Dayton, Ohio, and Gary Long, of Anderson, S.C.

Bowman is a three-time Ohio state high school champion, winning the 200 freestyle both his junior and senior years and the 100 butterfly as a senior. He owns the Ohio state record in the 200 freestyle. Bowman attends Wayne High School and comes from the same swim club as current Auburn swimmer Shawn Blatt.

Long swims the individual medley and the middle distance freestyles and at one time has held the South Carolina state record in every stroke. He attends T.L. Hanna High School and swims for the Anderson Swim Club where he has become one of the top junior nationals swimmers.

"Rod and Gary both can help us as freshmen," Asmuth said. "There are not

many male high school swimmers who are competing on the national level. Since both of them have scored at the senior nationals before they've entered college they have more experience than many others coming into college."

Asmuth said he may sign as many as five more swimmers before ending Auburn's 1984 recruiting. Auburn's men and women swim teams both finished third in the SEC in 1984, and the women placed sixth at the NCAA meet while the men swam to an eighth place finish.

## Upcoming Club Meetings

Mark your calendar for the Auburn Club meetings listed below for June, July, and August. Details will be sent to alumni in the area nearer the meeting date.

- June 21, Lowndes County.
- June 22, Marshall County.
- June 29, Kansas City, Mo.
- July 12, Gulf Coast, Miss.; Memphis, Tenn.; and Cherokee County.
- July 13, Dallas, Tex.
- July 14, Atlanta, Ga.
- July 17, Bibb County and Warner Robins, Ga.
- July 19, South Talladega and Tullahoma, Tenn.
- July 23, Hale County and Perry County.
- July 24, Walker County, Blount County, Henry County, Shelby County, and Crenshaw County.
- July 26, Montgomery, Sumter County, Randolph County, Barbour County, Monroe County, and Russell County.

## News of Auburn Clubs

Seventy-five members of the Franklin County Auburn Club met on May 10 to hear retired Dean of Students James E. Foy talk about Auburn. James E. Sibley '59 completed his term as club president and new officers were elected. Donald B. Ezzell '63 is new president; Jack N. Fowler '66, vice president; Luther B. James '64, secretary; and Patricia A. King '75, treasurer. Members of the board of directors are James D. Sibley '59, Waymon Pace '72, Dwight Morrow '70, Homer Vinson '53, and John Morrow '50.

Jackson County Auburn Club met on May 10 at the home of Bob and Elizabeth Word. Assistant football coach Jack Crowe talked about spring practice and the outlook for fall. Gerald R. Paulk completed his term as club president. New officers are Donald Edward Webb '70, president; Robert D. Word '55, vice president in charge of scholarships; Hamlin L. Caldwell, III, '76, vice president in charge of programs; and Sue Watson Paulk '74, secretary-treasurer.

On April 17 Johnnie Hartzog '50, president of the Butler County Auburn Club, welcomed 249 Auburn alumni and friends to a meeting featuring Coach Pat Dye and hosted by the Butler County Club and the Lowndes County Auburn Club. Coach Dye talked about some of the members of his team and looked ahead to the fall schedule.

The Jacksonville Area Auburn Club met in Orange Park, Fla., on April 28. G.W.

Whitmire, Jr., '47 is president of the club. Thirty-five members attended.

Athletic Director Pat Dye spoke April 10 at the Greater Valley Area (Chambers County) Auburn Club meeting in Valley. Accompanying Dye was Leslie Hamby of the Alumni Office. Club President Joel Thomas Lyons '75 presided at the dinner-meeting attended by 280 alumni and friends.

Football player Dowe Aughtman was honored with a banquet at the March 29 Escambia County Auburn Club meeting in Brewton. Teammate Pat Arrington, Coach Pat Dye, Coach Wayne Hall, and Alumni Director Buck Bradberry joined Aughtman at the meeting, presided over by Club President Charles W. McDaniel '68. The meeting, attended by 187 people, also included club officer elections. The following people will take office in July: Karl James Robinson '79, president; John Kenneth Tucker '69, vice president; John L. Russell '78, secretary and treasurer; and directors Dr. Thomas Greer Moore '80, Randell G. Nichols '79, Charles W. McDaniel '68, Phillip L. Parker '70, and Troy L. Curtright '66.

Etowah County Auburn Club held an awards banquet April 5 in Gadsden to honor J.R. Davis for outstanding service and Doug Smith as outstanding athlete. Coach Pat Dye spoke to 300 people at the meeting presided over by Joe David Copeland. The newly-elected officers are Harold C. Sharpe, Jr., '41, president; Don Morris, 1st vice president; Barbara Gantt, secretary; Earl Gantt '63, treasurer; Cathy Waldrup, 2nd vice president; and Jerry Vice, 3rd vice president.

Metro Washington Auburn Club recently elected the following new officers: President, Bill Iber '63; vice president, Lewis Woodard, Jr., '73; secretary, Pat Nelson '59; treasurer, John Ramsey '53; publicity chairman, Roland Heard '55; and scholarship chairman, Richard Meagher '57. Serving on the advisory board are Jim Phillips '61 (outgoing president and chairman of the board), Jody Henson, Bob Henson '58, Hobie Henderson '61, Ed Roukema '40, Rod Hastie '82, and Suzanne Respass '78.

May 8 was a busy day for the Hale County Auburn Club with their afternoon reception and evening banquet in Greensboro on "Dr. James E. Martin Appreciation Day." President Martin spoke at the reception, attended by 150, and the banquet, attended by 325 club members and friends. Club president Bernard T. Martin '74 (no relation) presided.

The New York Metro Auburn Club elected new officers at the social on May 17 when Alumni Director and Director of Development Buck Bradberry was guest speaker. New president Lee Ann Tarvin '84 presided. Other officers are Ann Weekly Robertson, vice president; Barb Belden Crawford '82, secretary; Lynne Marie Laughna '82, treasurer; Jessica O. Copeland, secretary; and Jim Masengill '73, special projects coordinator.

The Albany Area Auburn Club honored Lionel James on May 8 with a Lionel James Day program in Albany, Ga., attended by more than 325 people. Dr. Thomas Mitcham '65 presided at the meeting. Speakers were football Coaches Dye, Casey, Orgel, and Daniel.

On May 17 the Marengo County Auburn Club had a busy meeting led by president Ken Snow '61. Jerry Smith '64 of the

# Alumnalities

1917-1935

Guy O. Burns '17 and his wife, Claire, live in Tampa, Fla.

William J. Howard, Sr., '17 of Montgomery has attended all 1917 class reunions, beginning with the 45th year. He and his wife, Fannie Lee, have one son, William J. Howard, Jr., '47.

Frank S. McFaden '21 is a retired contractor and lives in Montgomery.

Dr. Herbert E. Cannon '23 lives in Covington, La., and has one son, Herbert.

John Preston Adams '24 is a retired farmer living in Alexander City with his wife, Mary. They have three children—John Neal Adams '51, Mary Nell Adams Newton, and Sara Dilla Adams Bost.

Henry W. Sweet '24 of Bessemer is escorting an Auburn tour for Brownell Tours to the Kick-off Classic, Auburn vs. Miami. He writes that Brownell offers a number of options for the Kickoff Classic and he would be glad to hear from interested alumni at 1830 Arlington Ave. Bessemer, Ala. or (205) 425-6685.

William Dryden '26 of Ft. Myers, Fla., is owner of Dryden Swine Farms, Wabash, Ind., where he and his wife, Evelyn, spend their summers. He is an honorary life member and past president of the Florida Anti-Mosquito Association and the Aquatic Plant Management Society, of which he was a founding member in 1961 on Useppa Island in the Gulf of Mexico. He is listed in the 1971 *Who's Who in the South and Southeast*. He has two stepchildren, four grandchildren, and three great-grandchildren.

P.T. Ray '26 worked for General Electric from 1926 to 1967. He and his wife, Margaret, live in Decatur, Ga.

The late Mickey O'Brien '26 was honored by the Jackson County High School in February. The old high school gymnasium was dedicated in his memory and honors his coaching record as he won more Alabama state high school basketball crowns than any other coach in basketball history. At Scottsboro, his teams garnered state trophies in 1934, 1938, and 1944, all achieved when he was in his late twenties and thirties, for he died in 1944 at the age of 38. A former "sub" on his 1940 squad, Stanley Jones '44, writes, "I know that Mickey knew more about recognizing and recruiting raw high school basketball talent than coaches Adolph Rupp and Bear Bryant knew about recruiting college basketball and football talent in their hey-day."

Warner C. Clisby, Jr., '27 and his wife, Nez, live in Birmingham. His uncle and brother attended Auburn—Vivian Pendleton Gaines '17 and Vivian Gaines Clisby '26.

V. Allen Bates '28 and his wife, Delsie, live in Montgomery. They have one son—Gene Allen Bates '52.

Kenneth L. Williams '28 was auditor for People's Bank and Trust Co. of Sylacauga from 1973 to 1983. Before that he was a self-employed accountant. He is currently the chairman of the board for People's Bank and Trust. He and his wife, Cylle, have one son, James E. Williams '52.

James L. Hartselle '29 lives in Chattanooga, Tenn.

Thomas A. Walthall '29 was honored by the Alabama Association of School Boards at its annual convention in Mobile for serving his 47th year on the Hale County Board of Education. He was elected board chairman in 1950 and has been re-elected to that position for 33 consecutive years. He also serves on the board of directors of The Marion Bank and Trust Company and is deacon and long-time treasurer of the Newbern Baptist Church. He and his wife, Laurice, celebrated their 50th wedding anniversary in 1980. Their four children attended Auburn as have seven of their grandchildren. Two presently are enrolled at Auburn—Lynn Smith and Tom Roberts.

Joe Givhan '30 of Mobile retired from the Alabama Cooperative Extension Service in 1977. After four decades of service, he was inducted

into the Alabama Livestock Hall of Fame in February. A founder of the Red Angus Association of America, he has spent a lifetime involved in the cattle industry, beginning as a 4-H boy in Dallas County. He showed cattle in the first state steer show and exhibited five grand champions in succession.

Thorne S. Winter '30 worked in various assignments for Southern Bell from 1930 to 1973. He retired as directory staff administrator at company headquarters in Atlanta. He is past president of numerous clubs, including the Atlanta Auburn Club. He and his wife, Blanche, have one son, Thorne, III.

Bob McLure '31 of Birmingham is semi-retired and has been in the real estate development business for the past 18 years.

John R. Loyd, Jr., '32 is president of Loyd's Incorporated of Arkansas and Missouri. He and his wife, Peggy, live in West Memphis, Ark. They have three sons, J.R., III, Mark, and Byron.

Burt W. Collins '32 worked for International Paper Co. from 1935 to 1974 except for the WW II years. He and his wife, Nellie, live in Bastrop, La., and have one son, Burt, Jr.

Col. Eugene Cook '33 of Montgomery retired from the Army in 1964 after 28 years of service. He has one son, Eugene Cosby Cook '64.

B.C. Pope, Jr., '33 lives in Pelham, Ga., with his wife, Louise. He worked for Civil Service for 20 years and retired from the Air Force as a lieutenant colonel after 20 years. He has two children—James B. Pope, who lives in Denver, Colo., and Deborah Pope Beckley, who lives in Lexington, Va.—and four grandchildren.

Winnie Tant Adams '33 of Ashland has two sons—Joseph, who attended Auburn for three years, and Dan.

William E. Friel '34 and his wife, Lois Bailey '36, live in Bay Minette. They have three children—Nancy C. Friel Huey '60, Jean B. Friel Hultgren '62, and Ercel T. Friel Donehoo '63, all who earned a BS in home economics.

Silas A. Lacy '34 of Newport News, Va., retired in 1973 as a construction engineer at Langley AFB, Va.

Harold Tucker '35 and his wife, Anestel Turner '35, live in Brecksville, Ohio.

1936-1939

Robert Franklin Blake '36 retired from Auburn National Bank in 1981 after having worked for them since 1937 and is a retired U.S. Army colonel. He and his wife, Jane Slack '36, live in Laguna Beach, Fla., and have five children—Janie K. '65, Robert F., Jr., '66, Mary Gay '71, John R. '79, and Anna Belle.

Dr. Merrick D. Thomas, Jr., '36 retired in Clearwater, Fla. He was a Diplomate for the American Board of Urology.

Eugene T. Sharley '36 and his wife live in Birmingham. They have one son, E. Todd Sharley, Jr., '66, who is married to Temple Bagwell '65.

Gordon MacKinney '36 lives in W. Caldwell, N.J.

Dr. I. Jay Sadow '37 is a retired lieutenant colonel of the Veterinary Corps. He sold his television and radio stations in Chattanooga, Tenn., and is now president of the MIZLOU Television Network-International Division.

Hubert L. Allen '37 retired in March 1983 and lives in Gallion.

Vernon Merritt '37 of Headland was president of Merritt's Beaten Biscuit Co. from 1946 to 1973. During that time he was executive secretary to the governor of Alabama and executive assistant for Alabama Public Service Commission. He and his wife, Leta, have four children—Julie DeVore, Vernon Merritt, Ann Falkner, and Alice Reese.

Dr. William Ellis McGee '37 lives in Phoenix, Ariz.

Malcolm W. Orr, Jr., '37 lives in Signal Mountain, Tenn.

Thomas Chalton Smith, Jr., '35 of Fayette retired as a brigadier general from the Air Force in 1973. He is chairman of Rural Development

**MATH TEACHER HONORED**—The Auburn chapter of Sigma Xi research society has named Martha Espy of Abbeville as outstanding high school science teacher. She has been teaching biology, physics, and chemistry for the past 15 and one-half years. After three years at Auburn, she attended Florida State University, earning both the bachelor's and master's degrees. Presenting her certificate and check is Malcolm A. Cutchins, a member of the awards committee.

Committee and secretary-treasurer for the hospital board of Fayette County Hospital. He and his wife, Gayle, have two children—Thomas, III, '66, and Phyllis.

John T. Maroney, Jr., '37 and his wife, Jane, live in Chattanooga, Tenn.

Josephine Mann Chesnut '37 lives in Campbellsville, Ky. She has one daughter, Mary Josephine Todd.

Lillian S. Sawyer '38 of Frisco City retired in 1972 from Monroe County Department of Pensions and Security. Since her retirement she has traveled across the U.S. and many foreign countries, including around the world in 1972. She is involved in numerous volunteer activities, among them the Monroe County Association for Mentally Retarded, Alabama Welfare Association, and the American Public Welfare Association.

Dewitte M. Yost '38 of Middleton, Ohio, is chairman and C.E.O. of the Sorg Paper Co. and director of Mosinee Paper Co. He has two children—Karen Yost '64, and Eric Yost '66. His granddaughter, Michele Yost, is a freshman at Auburn.

John DePalma '38 of Roselle Park, N.J., is a self-employed architect. He and his wife, Florence, have three children—John, Richard, and Josephine.

Edwin E. Sundberg '39 of Mobile is president and owner of Sun Guard Service, Inc., and a member of the Mobile Lion's club. He and his wife, B.J., have two daughters—Margaret Ruth Sundberg Guilbert '68 and Laura Sundberg Greer.

Lena Grace Mathison '39 lives in Huntsville. She has two children—Kermit Mathison and Helen Mathison Hooker.

Thomas W. Athey, Jr., '39, of Grady, has been a farmer and cattleman since 1947. He is a member of the Montgomery Rotary Club, Montgomery Production Credit Association, and Alabama Cattlemen's Association. He and his wife, Mildred, have four children—Thomas, III, '64 who has a Ph.D. from Tufts; John '72, DVM; Charles '76, DVM; and Anne Payne,

who attended Auburn one year and graduated from the University of South Carolina.

1940

John T. Warner, Jr., retired from Ivan Allen Co., in Greenville, S.C., in 1983. Soon after his retirement he had a severe heart attack that culminated in five-by-pass heart surgery March 1, 1984. He writes that he is "making great progress and doing well."

Lewis R. Diamond retired from his animal hospital practice in New York in 1982. Currently, he is engaged as a consultant in the human hospital pediatric hospital where he instituted a human-animal bond program, bringing cats and small dogs to chronically-ill children. He lives in Orlando, Fla., where he is gardening, playing tennis, and sculpturing, using aluminum Thomas rods as the body basis for figures.

Judson D. Gary was county supervisor of USDA's Farmer's Home Administration from 1940 to 1973, and was real estate broker and appraiser from 1973 to 1983. He is currently a member of the Greenville Rotary Club. He and his wife, Louise, have three children—James David Gary '82; John Lawrence Gary, who attended Auburn; and Richard Hall Gary, an Auburn sophomore.

Robert Presley Robbins was a teacher for Coffee High School from 1947 to 1983 and director of Florence Little Leagues for 23 years. He and his wife, Ruth, live in Florence, have three children—William, Walter, and Diane Louise.

Ralph L. Williams, DVM, lives in Raleigh, N.C.

Alex Fulton McKenzie, Jr., and his wife, Mildred, live in Marietta, Ga.

Frank Britton Brown, DVM, lives in Maplesville.

Carl C. Morgan, Jr., and his wife, Jane, live in Selma. They have three children—Janie '69, Warnell, and Carl, III, who lacks three hours towards graduation.

1941-1943

Elwyn Othell Creel '41 lives in Cullman.  
James H. Martin, Jr., '41 of Gastonia, N.C., is chairman and chief executive officer of Ti-Caro, Inc., one of the textile industry's fastest-growing and most-profitable companies. It combines three related businesses—yarns, threads, and knit fabrics. He is also president of the industry's trade group, the American Textile Manufacturer's Institute, and chairman of the American Fiber Textile Apparel Coalition. He is married and has four children.

John J. Partin '41 lives in Tallahassee, Fla.  
John J. Still '41 and his wife, Priscilla, live in Scranton, Pa., and have four children—Marcia, Nick, Cynthia, and Hallie.

James Auston Green '41 worked for USDA Soil Conservation Service from 1941 to 1973, and worked for Surface Mine Reclamation Commission between 1980 and 1983. He is a member of the Soil Conservation of America and the Air Force Reserve Officer's Association. He lives in Birmingham with his wife, Leola.

Lt. Col. David Robinson Savelle '41 and his wife, Betty Jo Salter '47, live in Warrington, Fla. They have two daughters—Patty Hudson who lives in Fort Smith, Ark., and Jeanne Sadel, who lives in Albuquerque, N.M.

M. Lawrence Crawford, DVM, '42, a Perry County cattleman who practiced veterinary medicine in Marion from 1946 until his retirement in 1976, has been inducted into the Alabama Livestock Hall of Fame.

Walter M. Pickard '42 retired as a colonel from the Air Force in 1975. He and his wife, Amy, live in Alexandria, Va. They have two children—John Pickard, a graduate of Huntington College; and Martha Pickard Zink, a graduate of Mary Washington College.

Thomas Issac Mastin, Jr., '42 and his wife, June Stallings '45, live in Chattanooga, Tenn. They have three children—Robert, an Auburn student; Tommy, a graduate of North Carolina; and Susan, a graduate of Georgia.

Dr. James S. Owen '42 is director of Elizabethtown Community College, and has been a district governor for his Rotary Club. He and his wife, Nancy Lea Brown '47, have three children—Beth Gaunce, Steve Owen, and Pat Owen.

Orval N. Frederick '42 of Montgomery retired from federal service as a personnel officer with the Veterans' Administration Regional office in 1979.

Robert G. Orrison '42 lives in Oak Ridge, Tenn., where he is retired from the nuclear division of Union Carbide.

David James MacKnight '42 and his wife, Margaret, live in Auburn.

George W. Scoggins, Jr., '43 and his wife, Eve, live in San Antonio, Tex., where he is district manager for Westinghouse Electric Corp. He is a member of the San Antonio Chamber of Commerce, Texas Research League, Texas Chamber of Commerce, Texas Association of Business, Red Cross, United Way of Bexar County, and chairman of Awareness Task Force Free Enterprise Council. He is also section chairman of IEEE and vice president of Sarah Roberts French Nursing Home.

Louise Gilmore Hayles '43 and her husband, Jasper, live in Auburn.

Dorothy Johnson McCarty '43 and her husband, Dennis, live in Delaplane, Va., and have four sons.

E. H. (Ham) Wilson '43 is the first and only executive vice president of the Alabama Cattlemen's Association. For the past 32 years he has promoted Alabama beef products and fought for laws in support of cattlemen in business. He was instrumental in organizing the Alabama Cattlemen's Association, now the largest cattlemen's association in the nation with 15,680 members. He is also responsible for the *Alabama Cattleman* magazine, with the second largest circulation in the country, a new building for the association, an annual rodeo in Montgomery, and an improved cattle industry. At Auburn, a student livestock pavilion is named the Ham Wilson Livestock Arena. He and his wife, Louise, live in Montgomery. He is a former member of the School of Agriculture Advisory Committee and served on the Search Committee for the president.

Aubrey Smith '43, superintendent of the Black Belt Substation in Marion Junction, was inducted into the 1983 Alabama Livestock Hall of Fame during ceremonies held February 14 in

**FISHERIES SCIENTISTS**—Certificates of Achievement were recently awarded to visiting scientists from foreign countries who have been studying fish nutrition, fish disease, and other related topics at Auburn's International Center for Aquaculture. Pictured, from left, are Dr. Bansh Singh, India; Dr. Narayanaswamy, India; Dr. E.W. Shell '52, director of the International Center for Aquaculture and head of the Department of Fisheries and Allied Aquacultures; Edzerd Haken, Netherlands; and R.R. Dhital, Nepal.

Montgomery. The first cross-breeding research in Alabama, and some of the earliest in the nation, was done at the Black Belt Substation with his assistance. Both the substation and Mr. Smith have received national attention for initial work on fungus-free fescue. He has authored or co-authored numerous publications on forage production, hay harvesting, cross-breeding of beef cattle, and animal nutrition. He is a member of Alpha Zeta, Gamma Sigma Delta, Lifetime Honorary member of the Alabama Cattlemen's Association, and is currently serving as director and vice president of Auburn's Agricultural Alumni Association. He and his wife, Evelyn McQueen, have three children—Shirra Rogers '70, who lives in LaGrange, Ga., with her husband, Hoyt '70, and their two children, Heather and Wendy; Les Smith and his wife, Leslie, both who attended Auburn, live in Selma; and Melanie Culpepper, who lives in Pleasant Hill with her two children and husband Bob, who attended Auburn.

Don Hopton-Jones '43 of Birmingham retired in April from Dudley, Hopton-Jones, Sims, and Freman, CPAs.

Benjamin I. Weatherly, Jr., '43 and his wife, Harriet, live in Silver Spring, Md. They have two children—Lynne W. Slusser and Brian S. Weatherly '77.

Dr. Vernon George Perry '43 and his wife, Jean, live in Gainesville, Fla. They have two sons—David and Ronald.

William B. Manning lives in Big Pine, Calif.

1944

Elizabeth Green lives in Mobile.  
Robert Bryars Smith of Mobile is sales

John Cooper '43, live in Auburn where he is assistant director of purchasing at AU. They have three children—John Robert Ball, a graduate of Emory and Duke in law and medicine; Barbara Ball Newman '75; and Mary Ellen Ball Kliner '82.

Erin Harper Salsman '45 lives in Jasper and has one son, Rick.

June Stallings Mastin '45 and her husband, Thomas '42, live in Chattanooga, Tenn.

Elizabeth Grimes Williams '46 and her husband, Robert Allen '50, live in Auburn.

1947

Jean J. LeVert lives in Marion with her husband, Darwin. They have three children—Eugene, 28, a graduate of Birmingham Southern; Lydia, 25, a graduate of Springhill College in Mobile; and Edward, 24, who will transfer to Auburn in the fall from George C. Wallace Junior College.

Frank Merlin Jones and his wife, Miriam, live in Trinity and have two children—Frank, Jr., '75, and Winifred.

Royce D. Northcutt of Pittsburgh, Pa., and his wife, Ruby, have three children—R.D. Northcutt, Jr. '82, 29; Marcia A. Northcutt, 26; and Kevin L. Northcutt, 20.

Norton S. Stein lives in Glen Rock, N.J., with his wife, Diana. They have two children—David and Perri.

Mixson C. Byrd and his wife, Mary, have two sons, Mixson, Jr., and George.

J. Franklin Keown lives in Decatur.

Jack H. Abraham, Jr., of Montgomery owns Abraham Brothers as well as residential and commercial real estate which he also manages. He also owns an insurance agency, a thoroughbred hunter, and jumper show horses. Austin B. Ezzell retired to Russellville in Franklin County with his wife last August. He was assistant director of the Cooperative Extension Service at Ohio State University.

James L. Williams lives in Chattanooga, Tenn.

William H. Yeatman lives in Birmingham.

Dr. Charles C. Hortenstine is professor emeritus at University of Florida. He was active in the department of soil chemistry with an emphasis on environmental problems associated with waste disposal from 1959 to 1981. He is a

representative for Gulf Rubber and Gasket. He and his wife, Martha, have four children—Robert, Cheryl, Michael, and Mary.

George L. Cobb of Pinehurst, N.C., retired from PPG Industries in 1982 after 36 years of service. He and his wife have two children—George, Jr., '66, and Jan.

Max Albert Burleson was a postmaster in Guin for 32 years. He continues to live in Guin and has one daughter, Kathy Ann Burleson Peoples '75.

Erston S. Cox, DVM, worked for USDA for 34 years and practiced veterinary medicine privately for 5 years. He lives in Austin, Tex., with his wife, Sarah.

Frank H. Vogler of Kennesaw, Ga., is senior scientist with Lockheed Georgia Co. and president of KVV Mortgage Associates, Inc. He and his wife, Shirley, have two sons—Frank, Jr., and Paul.

1945-1946

Dr. Thomas V. Raines, Jr., '45 is a veterinary medical officer for the Food and Drug Administration. He has published in various journals on topics such as "Encephalitic Aspergillosis in Turkeys" and "FDA Requirements for Approval of Minor Use of Drugs in Animals." He belongs to the American Veterinary Medical Association, Poultry Science, American Society of Parasitologists, American Association of Avian Pathologists, and the D.C. Veterinary Medical Association. He and his wife, Nancy Sallade '45, live in Potomac, Md. She is past president of the hospital auxiliary in Norwich, N.Y., a member of Citizen Advisory Committee, and Crisis Center. They have one daughter, Phoebe Raines Stone.

Ellen Williams Ball '45 and her husband,

member of Soil Science Society of America, American Society of Agronomy, Soil and Crop Science Society of Florida, and the American Institute of Chemists. He and his wife, Dorothy, live in St. Augustine, Fla., and have three children—Margaret, Susan, and Ted, an Auburn senior in chemical engineering.

Dr. Philip Bookman and his wife, Miriam, live in Willingboro, N.J. They have two children—Alan and Fran.

Charles L. Seay of Kingsport, Tenn., is product management director for Eastman Chemical Products, president of the Kingsport Rotary Club and a director of the Fine Arts Center and Kingsport Symphony. He and his wife, Mary, have four children—Mary Lou, Linda Karen, John Charles, and David Heaton.

George F. Mandy of Homewood is assistant vice president of Southern Natural Gas Co. and a member of ASME, American Gas Association, and Southern Gas Association. He and his wife, Anne, a registered nurse, have two children—Donald, and Lynda '81.

Rufus Elmo Harbin of Mobile and his wife, Mary, have one son, Winston, who is an Auburn student. Mr. Harbin is vice president of Green-Hastings and Harbin, Inc., has interests in land and real estate, and belongs to the Mobile and Atlanta Claiming Associations.

James Edward Coward of Picayune, Miss., is project engineer for NASA and a registered engineer in Alabama and Mississippi. He and his wife, Stella Rigas '47, have three children—Dr. Joseph S. Coward '71, James T. Coward, and Catherine E. Coward.

Col. Fred H. Henderson, Jr., is retired from the Air Force. He and his wife, Ruth, have three children—Stephen, Barbara, and Nancy.

Lyda Smith Bostick is a vocational home economics teacher at Chattanooga High School. She belongs to the American, Tennessee and Chattanooga Area Home Economics Associations, American Vocational Association, and United Teaching Profession. Her husband, Shelley M. Bostick '48, is cogeneration development staff manager of the direct service branch for the division of Energy Use and Distribution Relations of TVA. He is a member of the Institute of Electrical and Electronic Engineers and Instructional Cogeneration Society. They have five children—Clyde, John, Gene, Connie, and Rebecca.

Jack Elrod lives in Collinsville with his wife, Martha. They have three children, Robert, Dan, and Ellen.

Winfred H. Thorp is field investigator for Texas Real Estate Commission. He is active in the Lions, Boy Scouts, and Elks Clubs. He and his wife, Rose, have two children, Robert and John.

1949

Lloyd L. Lively of Huntsville is deputy director of product assurance for the U.S. Army Missile Command. He is president of the Huntsville Kiwanis Club and active with the Huntsville Museum of Art and the *Association of U.S. Army*. He and his wife, Phyllis, have two children, Lloyd, III, '73, and Elizabeth Ann (Libby) '76.

F. Burt Vardeman of Atlanta, Ga., is property manager/treasurer of Presbyterian Center, Inc., which is the national headquarters of Presbyterian Church, president of National Asbestos Council, and past president of Building Owners and Managers Association of Atlanta.

Lonzo W. Johnson is principal owner of North Alabama Engineering Co., Inc., in Decatur. He is past president of the Kiwanis Club and is chairman on the board of Zoning Adjustment for the city of Decatur. He and his wife, Mary Alice Shows '48, have three children, Kathy Martin, Mary Susan Day '66, and Jennifer Darnell, an Auburn pharmacy student.

Robert H. Allgood and his wife, Mary Hall '50, live in Marietta, Ga.

Ann Coulter Griggs and her husband, Jimmy, live in Columbus, Ga., and have two daughters, Cecilia, 21, and Julie, 18.

Willard J. Reeves retired in 1980 from the Soil Conservation Service, USDA, after 28 years of service. He and his wife, Peggy, live in Monroeville and have one son, Glenn '81.

Rexford A. Seay is department head of field engineering for Enwright Associates. He and his wife, Margaret, live in Greenville, S.C. They have six children—Ben '77, Kathy, Mike '77, John, '81, and David, an Auburn student.

Dr. John P. Mims was recognized by the City of Tusculumbia when October 28, 1983 was proclaimed "Dr. Mims Day" in appreciation for his 25 years of service as Deshler High School's team doctor. A reception and presentation of gifts and plaques marked the half-time at the football game that night. Dr. Mims has a general surgery practice.

## Auburn 'Invaded' For President's Day

By Michael Jernigan

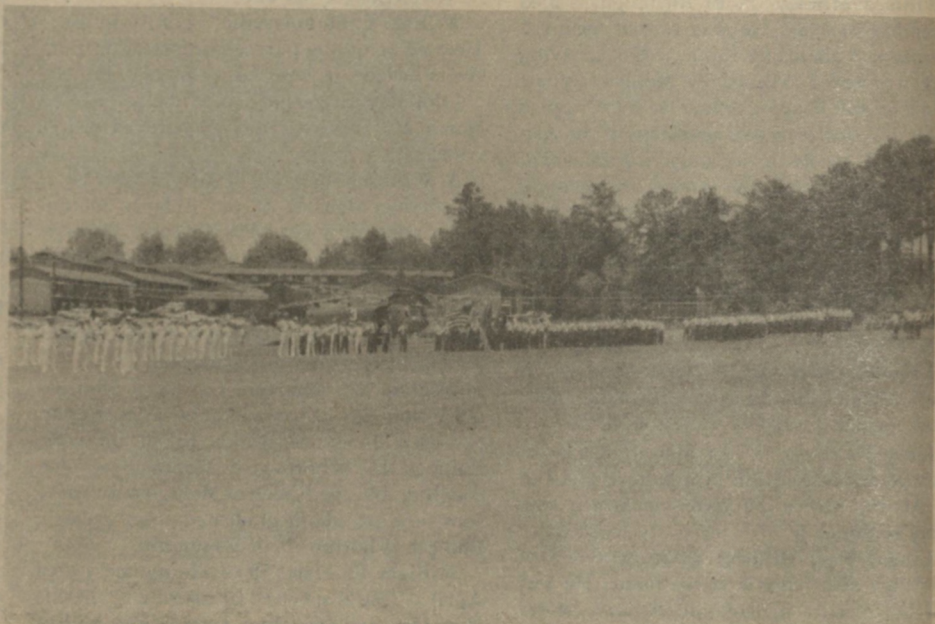

It seemed for all intents and purposes to be another lazy spring afternoon on the Auburn campus. A crowd of several hundred spectators out on the drill field was just beginning to disperse after watching Auburn's Army, Navy, Marine, and Air Force ROTC units present themselves to President Martin to climax festivities on President's Day, an annual dress parade put on by Auburn's combined ROTC programs.

Without warning, a pair of deadly jet fighters suddenly swept in on the crowd at little more than tree-top level, the roar of their huge engines deafening the crowd. Close behind followed a low-flying helicopter, which hovered motionless some 200 feet above the ground to disgorge four fiercely armed men in fatigues and black berets. Was it a terrorist attack? Had the Soviets decided to do even more than boycott the Olympics? Some people may have wondered. Instead, it was only an exciting finish to the President's Day 1984 program.

The afternoon's activities began with the playing of assembly by the Auburn band. According to the parade announcer, this music has been played to assembled troops since the middle ages. The piece consists mainly of three resonant chords

which are symbolic of the three cheers of a crowd. Following the assembly, President Martin presented awards to a group of outstanding cadets. Each battalion of cadets then passed before the reviewing stand to salute President Martin and several military VIPs who attended the ceremonies. As each group passed the stand, its battalion pennant, or Guidon, was dipped in salute. The Guidon, the crowd was informed, is another bit of military pageantry descended from ancient times. Even before warfare was truly formalized by such groups as the Romans, Guidons consisting of colored hay on long poles were used to help rally troops to their assembly points.

The band then capped off the review with the playing of another traditional fight song—"War Eagle." But the day was far from over. Shortly after the conclusion of the dress parade, two RF4 Phantom jets from the Air National Guard made several low altitude passes over the field. Next followed a demonstration of hand-to-hand combat and rappelling techniques put on by a U.S. Army Ranger team from Fort Benning, Ga. The rappelling demonstration was somewhat unique in that the Rangers rappelled not down the side of a building or a cliff, but from a helicopter hovering 200 feet from the ground. This same helicopter later returned to pick up two Rangers and carry them off suspended from a cable below the helicopter for a quick aerial tour of the Auburn campus. No doubt more than one sunbathing coed was surprised to see the airborne sightseers pass over.
